

SPECIES KNOWN TO BE ALIVE AS OF AUGUST 2005

FAMILY	GENUS	SPECIES	COMMENTS
Acanthaceae	<i>Graptophyllum</i>	<i>ilicifolium</i>	Easy to grow
Acanthaceae	<i>Graptophyllum</i>	<i>reticulatum</i>	Slow growing
Acanthaceae	<i>Graptophyllum</i>	sp. Emu Creek	Easy to grow
Acanthaceae	<i>Graptophyllum</i>	<i>spinigerum</i>	Easy to grow
Acanthaceae	<i>Graptophyllum</i>	<i>thorogoodii</i>	Easy to grow
Acanthaceae	<i>Hypoestes</i>	<i>floribunda</i> var. <i>floribunda</i>	Just planted
Akaniaceae	<i>Akania</i>	<i>bidwillii</i>	Slow, remarkably hardy in sun
Alangiaceae	<i>Alangium</i>	<i>villosum</i> subsp. <i>polyosmoides</i>	Just planted
Amaryllidaceae	<i>Crinum</i>	<i>pedunculatum</i>	Grows well
Amaryllidaceae	<i>Crinum</i>	<i>venosum</i>	Grows steadily, needs more sun
Amaryllidaceae	<i>Proiphys</i>	<i>amboinensis</i>	Grows well
Amaryllidaceae	<i>Proiphys</i>	<i>cunninghamii</i>	Grows well, need warm site
Anacardiaceae	<i>Blepharocarya</i>	<i>involutrigera</i>	Easy and fast growing
Anacardiaceae	<i>Euroschinus</i>	<i>falcata</i> var. <i>falcata</i>	Grows well
Anacardiaceae	<i>Pleiogynium</i>	<i>timorense</i> (hairy leaves and glabrous leaf forms)	Easy, fruits when 2m tall
Anacardiaceae	<i>Rhodosphaera</i>	<i>rhodanthema</i>	Grows well, can become scrappy with age
Anacardiaceae	<i>Rhus</i>	<i>taitensis</i>	Grows easily, suckers, but not weedy
Anacardiaceae	<i>Semecarpus</i>	<i>australiensis</i>	Fruits, dislikes being shaded in wet sites
Angiopteridaceae	<i>Angiopteris</i>	<i>evecta</i>	Must have lots of moisture and shade
Annonaceae	<i>Artabotrys</i>	sp. Claudie River (B.Gray 3240)	Easy, interesting species
Annonaceae	<i>Cananga</i>	<i>odorata</i>	Grows slower than tropics, but flowers
Annonaceae	<i>Desmos</i>	<i>goezeanus</i>	recently planted
Annonaceae	<i>Fitzalania</i>	<i>heteropetala</i>	Slow
Annonaceae	<i>Haplostichanthus</i>	sp. "Johnstone River"	Very slow growing (Hairy leaf)
Annonaceae	<i>Meiogyne</i>	<i>cilindrocarpa</i>	Grows slowly (nice apricot fruits)
Annonaceae	<i>Meiogyne</i>	<i>stenopetala</i> subsp. <i>stenopetala</i>	Slow growing
Annonaceae	<i>Melodorum</i>	<i>leichhardtii</i>	Grows well
Annonaceae	<i>Melodorum</i>	<i>uhrii</i>	Recently planted, hairy leaves
Annonaceae	<i>Miliusa</i>	<i>brahei</i>	Slow growing, specimens poor quality
Annonaceae	<i>Miliusa</i>	<i>horsfieldii</i>	Slow growing, specimens poor quality
Annonaceae	<i>Mitrephora</i>	<i>diversifolia</i>	Slow growing but doing well
Annonaceae	<i>Polyalthia</i>	<i>michaelii</i>	Grows slowly, need protection

Annonaceae	<i>Polyalthia</i>	<i>nitidissima</i>	Grows well
Annonaceae	<i>Polyalthia</i>	sp. Wyvuri (B.P.Hyland RFK2632)	Grows steadily, faster after 6 years
Annonaceae	<i>Pseuduvaria</i>	<i>froggattii</i>	Slow growing, attractive new growth
Annonaceae	<i>Xylopia</i>	<i>maccraeae</i>	Moderately slow but over 2m
Apocynaceae	<i>Alstonia</i>	<i>actinophylla</i>	Slow, need full sun and hot site
Apocynaceae	<i>Alstonia</i>	<i>constricta</i>	Fast
Apocynaceae	<i>Alstonia</i>	<i>muelleriana</i>	Very fast
Apocynaceae	<i>Alstonia</i>	<i>scholaris</i>	Fast, but in stages
Apocynaceae	<i>Alstonia</i>	<i>spectabilis</i> subsp. <i>spectabilis</i>	Fast
Apocynaceae	<i>Alyxia</i>	<i>ilicifolia</i>	Beautiful new growth
Apocynaceae	<i>Alyxia</i>	<i>magnifolia</i>	Resembly fast growing
Apocynaceae	<i>Alyxia</i>	<i>oblongata</i>	syn. subsp. major
Apocynaceae	<i>Alyxia</i>	<i>orophila</i>	Compact growth habit
Apocynaceae	<i>Alyxia</i>	<i>ruscifolia</i>	SE,QLD and Local. Good for shade
Apocynaceae	<i>Alyxia</i>	<i>spicata</i>	Recently planted
Apocynaceae	<i>Cerbera</i>	<i>floribunda</i>	Mod fast grower. Fruits
Apocynaceae	<i>Cerbera</i>	<i>inflata</i>	Slow growing at first then fast
Apocynaceae	<i>Cerbera</i>	<i>manghas</i>	Very slow growing but flowers
Apocynaceae	<i>Cynanchum</i>	<i>carnosum</i>	Recently planted
Apocynaceae	<i>Hoya</i>	<i>australis</i> subsp. <i>australis</i>	Grows well
Apocynaceae	<i>Hoya</i>	Gilles	Grows well
Apocynaceae	<i>Hoya</i>	<i>macgillivrayi</i>	Grows amazingly well
Apocynaceae	<i>Hoya</i>	<i>pottsii</i>	Grows slowly but ok
Apocynaceae	<i>Kopsia</i>	<i>arborea</i>	Recently planted, slow
Apocynaceae	<i>Neisosperma</i>	<i>kilneri</i>	Recently planted
Apocynaceae	<i>Neisosperma</i>	<i>poweri</i> (NQ red and NSW orange)	Needs sheltered position
Apocynaceae	<i>Ochrosia</i>	<i>elliptica</i>	Grows well, prone to caterpillar attack
Apocynaceae	<i>Ochrosia</i>	<i>minima</i>	Grows well, fruits at 30cm tall
Apocynaceae	<i>Ochrosia</i>	<i>moorei</i>	Grows very slowly if at all
Apocynaceae	<i>Tabernaemontana</i>	<i>orientalis</i>	Grows well, flowers at half metre tall
Apocynaceae	<i>Tabernaemontana</i>	<i>pandacaqui</i>	Easy. Self recruits
Apocynaceae	<i>Tylophora</i>	<i>benthamii</i>	Recently planted
Apocynaceae	<i>Wrightia</i>	<i>laevis</i> subsp. <i>millgar</i>	Winter holds it back
Araceae	<i>Alocasia</i>	<i>brisbanensis</i>	Easy in moist spot
Araceae	<i>Amorphophallus</i>	<i>galbra</i>	In trial stage
Araceae	<i>Amorphophallus</i>	<i>paeoniifolius</i>	In trial stage

Araceae	<i>Colocasia</i>	<i>esculenta</i> var. <i>aquatilis</i>	Needs wet warm site
Araceae	<i>Epipremnum</i>	<i>pinnatum</i>	Grows steadily
Araceae	<i>Scindapsus</i>	<i>altissimus</i>	Grows steadily, tolerates cold
Araliaceae	<i>Delarbrea</i>	<i>michieana</i>	Easy in shade
Araliaceae	<i>Gastonia</i>	sp. Bloomfield River (W.R.Petrie AQ443302)	Recently planted, prone to weevil attack
Araliaceae	<i>Mackinlaya</i>	<i>confusa</i>	Grows easily, not weedy like <i>macrosciadea</i>
Araliaceae	<i>Mackinlaya</i>	<i>macrosciadea</i>	Grows too well
Araliaceae	<i>Mackinlaya</i>	sp. Cape York	Grows slower than others. In NQ also.
Araliaceae	<i>Mackinlaya</i>	Tolga Scrub	Grows too well
Araliaceae	<i>Polyscias</i>	<i>australiana</i>	Grows well. Fruits
Araliaceae	<i>Polyscias</i>	<i>bellendenkerensis</i>	Recently planted, slow
Araliaceae	<i>Polyscias</i>	<i>elegans</i>	Easy, can sucker
Araliaceae	<i>Polyscias</i>	<i>macgillivrayi</i>	Grows well. Fruits
Araliaceae	<i>Polyscias</i>	<i>mollis</i>	Prone to borer attack
Araliaceae	<i>Polyscias</i>	<i>murrayi</i>	Easy
Araliaceae	<i>Polyscias</i>	<i>nodosa</i>	Easy, fruits
Araliaceae	<i>Polyscias</i>	<i>purpurea</i>	Relatively easy
Araliaceae	<i>Polyscias</i>	<i>willmottii</i>	Bushy species
Araliaceae	<i>Schefflera</i>	<i>actinophylla</i>	Grows too well, 1 specimen only
Araliaceae	<i>Schefflera</i>	<i>bractescens</i>	Grows slowly but well
Araliaceae	<i>Schefflera</i>	<i>elliptica</i>	Grows well
Araucariaceae	<i>Agathis</i>	<i>atropurpurea</i>	Moderately fast growing in right spot
Araucariaceae	<i>Agathis</i>	<i>robusta</i>	Easy
Araucariaceae	<i>Agathis</i>	<i>microstachya</i>	Fast growing
Araucariaceae	<i>Araucaria</i>	<i>bidwillii</i>	SE QLD and NE QLD genotypes different
Araucariaceae	<i>Araucaria</i>	<i>columnaris</i>	New Caledonia. Recently Planted
Araucariaceae	<i>Araucaria</i>	<i>cunninghamii</i> var. <i>cunninghamii</i>	Local and Cape York. Easy to grow
Araucariaceae	<i>Araucaria</i>	<i>hunsteinii</i>	Growing well. Native to PNG
Arecaceae	<i>Archontophoenix</i>	<i>alexandrae</i>	Vigorous grower. Won't plant anymore
Arecaceae	<i>Archontophoenix</i>	<i>cunninghamiana</i>	Grows well
Arecaceae	<i>Archontophoenix</i>	<i>maxima</i>	Very fast growing
Arecaceae	<i>Archontophoenix</i>	<i>myolensis</i>	Grows well with extra water
Arecaceae	<i>Archontophoenix</i>	<i>purpurea</i>	Best in shade with water. Fullsun detrimental
Arecaceae	<i>Archontophoenix</i>	<i>tuckeri</i>	Easy to grow, slender
Arecaceae	<i>Arenga</i>	<i>australasica</i>	Grows steadily, very slow at first
Arecaceae	<i>Calamus</i>	<i>aruensis</i>	Difficult, but alive

Arecaceae	<i>Calamus</i>	<i>australis</i>	Easy
Arecaceae	<i>Calamus</i>	<i>caryotoides</i>	Easy
Arecaceae	<i>Calamus</i>	<i>muelleri</i>	Easy
Arecaceae	<i>Calamus</i>	<i>vitiensis</i>	Cold and dry intolerant
Arecaceae	<i>Carpentaria</i>	<i>acuminata</i>	Slow growing but steady
Arecaceae	<i>Caryota</i>	<i>albertii</i>	Slow but steady
Arecaceae	<i>Howea</i>	<i>forsteriana</i>	Grows well
Arecaceae	<i>Laccospadix</i>	<i>australasica</i> (single, clumping & red growth)	Grows well
Arecaceae	<i>Licuala</i>	<i>ramsayi</i> var. <i>ramsayi</i>	Grows well in wet-moist soil
Arecaceae	<i>Licuala</i>	<i>ramsayi</i> var. <i>tuckeri</i>	Grows rather fast
Arecaceae	<i>Linospadix</i>	<i>microcarya</i>	Grows steadily
Arecaceae	<i>Linospadix</i>	<i>minor</i>	Grows steadily
Arecaceae	<i>Linospadix</i>	<i>monostachya</i>	Grows well
Arecaceae	<i>Livistona</i>	<i>australis</i>	Easy to grow
Arecaceae	<i>Livistona</i>	<i>benthamii</i>	Easy to grow
Arecaceae	<i>Livistona</i>	<i>concinna</i>	Recently planted, growing well (syn sp. Cooktown)
Arecaceae	<i>Livistona</i>	<i>decora</i>	Easy to grow-best in wetter areas (syn <i>decipiens</i>)
Arecaceae	<i>Livistona</i>	<i>drudei</i>	Recently planted, growing well
Arecaceae	<i>Livistona</i>	<i>fulva</i>	Recently planted, growing well
Arecaceae	<i>Livistona</i>	<i>lanuginosa</i>	Moderate grower, large species
Arecaceae	<i>Livistona</i>	<i>mariae</i> subsp. <i>mariae</i>	Attractive red leaves
Arecaceae	<i>Livistona</i>	<i>mariae</i> subsp. <i>rigida</i>	Rather fast
Arecaceae	<i>Livistona</i>	<i>muelleri</i>	Slow in shade, faster in sun
Arecaceae	<i>Livistona</i>	sp. Eungella (A.N.Rodd 3798) (aka. <i>L. australis</i>)	Grows well
Arecaceae	<i>Normanbya</i>	<i>normanbyi</i>	Grows well
Arecaceae	<i>Oraniopsis</i>	<i>appendiculata</i>	Grows well, need water and shade
Arecaceae	<i>Ptychosperma</i>	<i>bleseri</i>	Slow growing
Arecaceae	<i>Ptychosperma</i>	<i>elegans</i>	Easy but slow at first
Arecaceae	<i>Ptychosperma</i>	<i>macarthurii</i>	Slow but over 2m tall
Arecaceae	<i>Wodyetia</i>	<i>bifurcata</i>	Grows well
Aristolochiaceae	<i>Aristolochia</i>	<i>acuminata</i>	Fast rampant grower
Aristolochiaceae	<i>Pararistolochia</i>	<i>australopithecurus</i>	Mod grower. (sp. Woopen creek)
Aristolochiaceae	<i>Pararistolochia</i>	<i>deltantha</i>	Grows steadily
Aristolochiaceae	<i>Pararistolochia</i>	<i>peninsularis</i>	Grows well, recently planted
Aristolochiaceae	<i>Pararistolochia</i>	<i>praevenosa</i>	Fast grower, easy in protected site. fruits
Aspleniaceae	<i>Asplenium</i>	<i>australasicum</i>	Easy

Aspleniaceae	<i>Asplenium</i>	<i>harmanii</i>	Grows well
Aspleniaceae	<i>Asplenium</i>	<i>nidus</i>	Hates cold soil
Aspleniaceae	<i>Asplenium</i>	<i>simplicifrons</i>	Dislikes growing in soil
Bignoniaceae	<i>Deplanchea</i>	<i>tetraphylla</i>	Easy but dislikes winter shade
Bignoniaceae	<i>Tecomanthe</i>	<i>hillii</i>	Slow to establish
Bignoniaceae	<i>Tecomanthe</i>	sp. Roaring Meg (L.J.Brass 20326)	Grown very well
Bixaceae	<i>Cochlospermum</i>	sp. ?	Tall open tree
Bombacaceae	<i>Adansonia</i>	<i>gregorii</i>	Slowly establishing, sunny hot site
Bombacaceae	<i>Bombax</i>	<i>ceiba</i> var. <i>leiocarpum</i>	Slow, but 2m tall
Boraginaceae	<i>Carmona</i>	<i>retusa</i>	Small growing plant, grows ok
Boraginaceae	<i>Cordia</i>	<i>dichotoma</i>	Quick grower, potential naturalisation
Boraginaceae	<i>Ehretia</i>	<i>acuminata</i> var. <i>acuminata</i>	Easy
Caesalpiniaceae	<i>Barklya</i>	<i>syringifolia</i>	Slow but eventual
Caesalpiniaceae	<i>Cassia</i>	<i>brewsteri</i> var. <i>brewsteri</i>	Grows well
Caesalpiniaceae	<i>Cassia</i>	<i>brewsteri</i> var. <i>marksiana</i>	Some grow well others don't
Caesalpiniaceae	<i>Cassia</i>	<i>brewsteri</i> var. <i>tomentella</i>	Grows well
Caesalpiniaceae	<i>Cassia</i>	<i>queenslandica</i>	Grows very well
Caesalpiniaceae	<i>Cassia</i>	sp. Kalpowar (DF2769)	Grows fast
Caesalpiniaceae	<i>Cassia</i>	sp. Paluma Range (GS450)	Grows fast
Caesalpiniaceae	<i>Intsia</i>	<i>bijuga</i>	Grows slowly but well
Caesalpiniaceae	<i>Lysiphyllum</i>	<i>carronii</i>	Grows slowly but well
Caesalpiniaceae	<i>Maniltoa</i>	<i>lenticellata</i>	Slow but flushes each summer
Caesalpiniaceae	<i>Peltophorum</i>	<i>pterocarpum</i>	Grows well, flowers often
Caesalpiniaceae	<i>Senna</i>	<i>acclinis</i>	Grows well
Caesalpiniaceae	<i>Senna</i>	<i>gaudichaudii</i>	(syn <i>C. surrattensis</i> <i>retusa</i> ?)
Caesalpiniaceae	<i>Senna</i>	<i>surattensis</i>	Grows easily
Caesalpiniaceae	<i>Storckiella</i>	<i>australiensis</i>	Fast growing
Capparaceae	<i>Capparis</i>	<i>arborea</i>	Natural and planted. Slow
Capparaceae	<i>Capparis</i>	<i>canescens</i>	Climber
Capparaceae	<i>Capparis</i>	<i>lucida</i>	Slow
Capparaceae	<i>Capparis</i>	<i>sarmentosa</i>	Slow to start climbing but now 2m up tree
Capparaceae	<i>Crateva</i>	<i>religiosa</i>	Poor performer, too shady
Casuarinaceae	<i>Allocasuarina</i>	<i>emuina</i>	Fast growing, flowered
Casuarinaceae	<i>Allocasuarina</i>	<i>inophloia</i>	Mod fast growing, flowered
Casuarinaceae	<i>Allocasuarina</i>	<i>littoralis</i>	Mod fast growing
Casuarinaceae	<i>Allocasuarina</i>	<i>torulosa</i>	Fast growing, flowered

Casuarinaceae	<i>Allocasuarina</i>	<i>grampiana</i>	Recently planted
Casuarinaceae	<i>Casuarina</i>	<i>cunninghamiana</i> subsp. <i>cunninghamiana</i>	Fast growing
Casuarinaceae	<i>Casuarina</i>	<i>equisetifolia</i> subsp. <i>incana</i>	Recently planted
Casuarinaceae	<i>Casuarina</i>	<i>glauca</i>	Fast growing
Casuarinaceae	<i>Casuarina</i>	<i>cristata</i>	Recently planted
Casuarinaceae	<i>Gymnostoma</i>	<i>australianum</i>	Easy to grow
Celastraceae	<i>Denhamia</i>	<i>pittosporoides</i> subsp. <i>pittosporoides</i>	Recently planted
Celastraceae	<i>Hedraianthera</i>	<i>porphyropetala</i>	Slow growing
Celastraceae	<i>Maytenus</i>	<i>bilocularis</i>	Grows easily
Celastraceae	<i>Maytenus</i>	<i>fasciculiflora</i>	Grows well
Celastraceae	<i>Pleurostyliia</i>	<i>opposita</i>	Slow
Celastraceae	<i>Salacia</i>	<i>chinensis</i>	Slow
Celastraceae	<i>Siphonodon</i>	<i>australis</i>	Grows very slowly
Chrysobalanaceae	<i>Maranthes</i>	<i>corymbosa</i>	Moderate growth, yellow tips in winter
Clusiaceae	<i>Calophyllum</i>	<i>costatum</i>	Grows well
Clusiaceae	<i>Calophyllum</i>	<i>sil</i>	Grows slowly but well, need more sun
Clusiaceae	<i>Garcinia</i>	<i>gibbsiae</i>	Grows very slowly but ok
Clusiaceae	<i>Garcinia</i>	<i>warrenii</i>	Grows well
Combretaceae	<i>Terminalia</i>	<i>arenicola</i>	Doesn't like winter
Combretaceae	<i>Terminalia</i>	<i>complanata</i>	Grows very fast
Combretaceae	<i>Terminalia</i>	<i>muelleri</i>	Needs northern aspect, grows well
Combretaceae	<i>Terminalia</i>	<i>porphyrocarpa</i>	Recently planted
Combretaceae	<i>Terminalia</i>	<i>sericocarpa</i>	Easy to grow
Corynocarpaceae	<i>Corynocarpus</i>	<i>cribbianus</i>	Grows steadily, flowered
Corynocarpaceae	<i>Corynocarpus</i>	<i>rupestris</i> subsp. <i>arborescens</i>	Grows well
Corynocarpaceae	<i>Corynocarpus</i>	<i>rupestris</i> subsp. <i>rupestris</i>	Wallabies eaten it. Growing back though
Cunoniaceae	<i>Acsmithia</i>	<i>davidsonii</i>	Recently planted
Cunoniaceae	<i>Caldcluvia</i>	<i>paniculosa</i>	Easy
Cunoniaceae	<i>Callicoma</i>	<i>serratifolia</i>	Grows well
Cunoniaceae	<i>Callicoma</i>	sp. aff. <i>serratifolia</i> (Nightcap road)	Grows slowly, dislikes dry
Cunoniaceae	<i>Ceratopetalum</i>	<i>gummiferum</i> "Alburys Red"	Recently planted
Cunoniaceae	<i>Ceratopetalum</i>	<i>hylandii</i>	Mod grower. Needs more sun
Cunoniaceae	<i>Ceratopetalum</i>	<i>macrophyllum</i>	Recently planted
Cunoniaceae	<i>Ceratopetalum</i>	<i>succirubrum</i>	Mod grower.
Cunoniaceae	<i>Ceratopetalum</i>	<i>virchowii</i>	Mod grower
Cunoniaceae	<i>Davidsonia</i>	<i>jerseyana</i>	Easy

Cunoniaceae	<i>Davidsonia</i>	<i>johnsonii</i>	Easy when cared for
Cunoniaceae	<i>Davidsonia</i>	<i>pruriens</i> (Rockingham Bay)	Easy
Cunoniaceae	<i>Davidsonia</i>	sp. "Wet Tropics-Atherton"	Easy
Cunoniaceae	<i>Geissois</i>	<i>benthamii</i>	Fast in good conditions
Cunoniaceae	<i>Geissois</i>	<i>biagiana</i>	Very fast
Cunoniaceae	<i>Pseudoweinmannia</i>	<i>lachnocarpa</i>	Moderate grower
Cunoniaceae	<i>Pullea</i>	<i>stutzeri</i>	Grows easily
Cunoniaceae	<i>Schizomeria</i>	<i>ovata</i>	Grows steadily but slowly
Cupressaceae	<i>Callitris</i>	<i>baileyi</i>	Grows easily
Cupressaceae	<i>Callitris</i>	<i>columellaris</i>	Grows easily
Cupressaceae	<i>Callitris</i>	<i>glaucophylla</i>	Recently planted
Cupressaceae	<i>Callitris</i>	<i>intratropica</i>	Grows well
Cupressaceae	<i>Callitris</i>	<i>macleayana</i>	Grows easily
Cupressaceae	<i>Callitris</i>	<i>monticola</i>	Grows slowly but well
Cupressaceae	<i>Callitris</i>	sp. aff. <i>intratropica</i> (Emerald Creek)	Growing well
Cyatheaceae	<i>Cyathea</i>	<i>cooperi</i>	Easy, self perpetuating
Cyatheaceae	<i>Cyathea</i>	<i>leichhardtiana</i>	Easy, self perpetuating
Cyatheaceae	<i>Cyathea</i>	<i>rebecca</i>	Slow, needs lots of moisture
Cycadaceae	<i>Cycas</i>	<i>angulata</i>	Slow, needs northern hot aspect
Cycadaceae	<i>Cycas</i>	<i>megacarpa</i>	Just planted
Cycadaceae	<i>Cycas</i>	<i>platyphylla</i>	Just planted
Cycadaceae	<i>Cycas</i>	<i>armstrongii</i>	Needs hot site
Cycadaceae	<i>Cycas</i>	<i>media</i> subsp. <i>banksii</i>	Flushes well
Cycadaceae	<i>Cycas</i>	<i>revoluta</i>	Growing well. Exotic species
Cycadaceae	<i>Cycas</i>	<i>thouarsii</i>	Growing well. Exotic species
Cyperaceae	<i>Gahnia</i>	<i>aspera</i>	Grows well
Dilleniaceae	<i>Hibbertia</i>	<i>scandens</i>	Self recruiting
Dioscoreaceae	<i>Dioscorea</i>	sp. Midgen Flat (weed?) <i>bulbifera</i> ?	Grows well in summer
Doryanthaceae	<i>Doryanthes</i>	<i>excelsa</i>	Easy, flowered once
Doryanthaceae	<i>Doryanthes</i>	<i>palmeri</i>	Easy
Dracaenaceae	<i>Cordyline</i>	<i>cannifolia</i>	Grows well
Dracaenaceae	<i>Cordyline</i>	<i>congesta</i>	Grows well
Dracaenaceae	<i>Cordyline</i>	<i>manners-suttoniae</i>	Grows easily. Poss. Naturalisation potentia
Dracaenaceae	<i>Cordyline</i>	<i>murchisoniae</i>	Grows well. Small
Dracaenaceae	<i>Cordyline</i>	<i>petiolaris</i>	Grows easily
Dracaenaceae	<i>Cordyline</i>	<i>rubra</i>	Grows easily

Dracaenaceae	<i>Cordyline</i>	sp / var. "Mt Lewis" (<i>fruticosa</i>)	Need water
Dracaenaceae	<i>Cordyline</i>	<i>stricta</i>	Grows easily
Dracaenaceae	<i>Pleomele</i>	<i>angustifolia</i> (Iron Range form)	Easy but needs air movement
Ebenaceae	<i>Diospyros</i>	<i>australis</i>	Slow growing
Ebenaceae	<i>Diospyros</i>	<i>cupulosa</i>	Grows well
Ebenaceae	<i>Diospyros</i>	<i>ellipticifolia</i> var. <i>ebenus</i>	Grows well in shade
Ebenaceae	<i>Diospyros</i>	<i>fasciculosa</i>	Just planted
Ebenaceae	<i>Diospyros</i>	<i>geminata</i>	Slow
Ebenaceae	<i>Diospyros</i>	<i>hebecarpa</i>	Slow growth but well
Ebenaceae	<i>Diospyros</i>	<i>humilis</i>	Slow
Ebenaceae	<i>Diospyros</i>	<i>littorea</i>	Just planted, not doing well
Ebenaceae	<i>Diospyros</i>	<i>mabacea</i>	Difficult to grow well I find
Ebenaceae	<i>Diospyros</i>	<i>pentamera</i>	Grows steadily
Ebenaceae	<i>Diospyros</i>	sp. Baird (BH9374)	Slow grower
Ebenaceae	<i>Diospyros</i>	sp. Mt White	Slow but successful
Elaeocarpaceae	<i>Aceratium</i>	<i>doggrellii</i>	Difficult to establish but grows well thereafter
Elaeocarpaceae	<i>Aceratium</i>	<i>ferrugineum</i>	Easy in shade, though sun tolerated
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>angustifolius</i>	Easy, narrower leaves than <i>E. grandis</i>
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>arnhemicus</i>	Easy
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>bancroftii</i>	Easy, fruits
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>carolinae</i>	Easy, layered growth habit
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>coorangooloo</i>	Easy, buttresses early, cuttings easy
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>culminicola</i>	Grows surprisingly well
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>eumundii</i>	Easy
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>foveolatus</i>	Easy
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>grahamii</i>	Easy, small tree
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>grandis</i>	Grows superbly well
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>johnsonii</i>	Easy, beautiful flowers
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>kirtonii</i>	Need a new specimen, not near a <i>Ficus</i> !
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>largiflorens</i> subsp. <i>largiflorens</i>	Grows well
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>largiflorens</i> subsp. <i>retinervis</i>	In a pot, steady grower
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>linsmithii</i>	Recently planted
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>obovatus</i>	Natural and recruits
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>reticulatus</i>	Grows well
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>ruminatus</i>	Grows well
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>sedentarius</i>	Easy (sp. Minyon)

Elaeocarpaceae	<i>Elaeocarpus</i>	<i>stellaris</i>	Grows surprisingly well
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>thelmae</i>	Recently planted
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>williamsianus</i>	Grows very well
Elaeocarpaceae	<i>Peripentadenia</i>	<i>mearsii</i>	Grows fast in good conditions
Elaeocarpaceae	<i>Peripentadenia</i>	<i>phelpsii</i>	Grows fast
Elaeocarpaceae	<i>Sloanea</i>	<i>australis</i> subsp. <i>australis</i>	Grows slowly away from water
Elaeocarpaceae	<i>Sloanea</i>	<i>langii</i>	Grows easily
Elaeocarpaceae	<i>Sloanea</i>	<i>woollsii</i>	Grows well
Epacridaceae	<i>Dracophyllum</i>	<i>sayeri</i>	Easy in shade and moist
Epacridaceae	<i>Trochocarpa</i>	<i>laurina</i>	Grows steadily
Euphorbiaceae	<i>Actephila</i>	<i>foetida</i>	Just planted
Euphorbiaceae	<i>Actephila</i>	<i>lindleyi</i>	Moderately slow growing
Euphorbiaceae	<i>Actephila</i>	sp. Cape Hillsborough	Slow growing
Euphorbiaceae	<i>Alchornea</i>	<i>thozetiana</i>	Grows well
Euphorbiaceae	<i>Aleurites</i>	<i>moluccana</i>	Branching spreading tree
Euphorbiaceae	<i>Aleurites</i>	<i>rockinghamensis</i>	Tall bushy tree
Euphorbiaceae	<i>Antidesma</i>	<i>bunius</i>	Fruits largest of all species
Euphorbiaceae	<i>Antidesma</i>	<i>erostre</i>	Fruits small
Euphorbiaceae	<i>Antidesma</i>	<i>ghaesembilla</i>	Fruits constantly
Euphorbiaceae	<i>Antidesma</i>	<i>parvifolium</i>	Becoming shaded out
Euphorbiaceae	<i>Baloghia</i>	<i>marmorata</i>	Slow growing
Euphorbiaceae	<i>Bischofia</i>	<i>javanica</i>	Easy
Euphorbiaceae	<i>Breynia</i>	<i>cernua</i>	Mod fast
Euphorbiaceae	<i>Breynia</i>	<i>oblongifolia</i>	Slow
Euphorbiaceae	<i>Breynia</i>	sp. Iron Range	Fast
Euphorbiaceae	<i>Bridelia</i>	<i>insulana</i>	Recently planted
Euphorbiaceae	<i>Bridelia</i>	<i>leichhardtii</i>	Mod fast
Euphorbiaceae	<i>Choriceras</i>	<i>majus</i>	Grows steadily, amazing new growth
Euphorbiaceae	<i>Choriceras</i>	<i>tricorne</i>	Grows partially well, likes dry country
Euphorbiaceae	<i>Cleidion</i>	<i>spiciflorum</i>	Grows well. Ornamental
Euphorbiaceae	<i>Cleistanthus</i>	<i>apodus</i>	Grows well
Euphorbiaceae	<i>Cleistanthus</i>	<i>cunninghamii</i>	Easy growing
Euphorbiaceae	<i>Cleistanthus</i>	<i>hylandii</i>	Attractive. Mod grower
Euphorbiaceae	<i>Cleistanthus</i>	<i>myrianthus</i>	Mod grower, hates dry weather
Euphorbiaceae	<i>Cleistanthus</i>	<i>semiopacus</i>	Quick grower, large plant
Euphorbiaceae	<i>Croton</i>	<i>arnhemicus</i>	Grows well

Euphorbiaceae	<i>Croton</i>	<i>capitis-york</i>	Check plants*
Euphorbiaceae	<i>Croton</i>	<i>phebalioides</i>	Mod grower, needs space
Euphorbiaceae	<i>Croton</i>	<i>stigmatus</i>	Mod grower
Euphorbiaceae	<i>Dimorphocalyx</i>	<i>australiensis</i>	Slow but progressive
Euphorbiaceae	<i>Dissiliaria</i>	<i>baloghioides</i>	Bushy, attractive new growth
Euphorbiaceae	<i>Dissiliaria</i>	<i>laxinervis</i>	Large leaves
Euphorbiaceae	<i>Dissiliaria</i>	<i>surculosa</i>	Easy, seedlings initially prolific but many die
Euphorbiaceae	<i>Drypetes</i>	<i>acuminata</i>	Easy
Euphorbiaceae	<i>Drypetes</i>	<i>deplanchei</i>	Easy
Euphorbiaceae	<i>Fontainea</i>	<i>australis</i>	Grows slowly but steadily
Euphorbiaceae	<i>Fontainea</i>	<i>picrosperma</i>	Grows slowly
Euphorbiaceae	<i>Fontainea</i>	<i>rostrata</i>	Grows steadily, recently planted
Euphorbiaceae	<i>Glochidion</i>	<i>benthamianum</i>	Fast
Euphorbiaceae	<i>Glochidion</i>	<i>ferdinandi</i> var. <i>ferdinandi</i>	Natural plants, can be prone to caterpillars
Euphorbiaceae	<i>Glochidion</i>	<i>harveyanum</i> var. <i>harveyanum</i>	Moderate growers
Euphorbiaceae	<i>Glochidion</i>	<i>hylandii</i>	Fast
Euphorbiaceae	<i>Glochidion</i>	<i>lobocarpum</i>	Fast
Euphorbiaceae	<i>Glochidion</i>	<i>philippicum</i>	Fast in good conditions
Euphorbiaceae	<i>Glochidion</i>	<i>pruinsum</i>	In pot, fast growing
Euphorbiaceae	<i>Glochidion</i>	<i>sumatranum</i>	Green and Purple forms North and South
Euphorbiaceae	<i>Grewia</i>	<i>latifolia</i>	Slow, in wrong spot
Euphorbiaceae	<i>Grewia</i>	<i>orientalis</i>	Fast at first, vine like
Euphorbiaceae	<i>Homalanthus</i>	<i>novoguineensis</i>	Grows fast dies young
Euphorbiaceae	<i>Homalanthus</i>	<i>nutans</i>	Self recruiting
Euphorbiaceae	<i>Hylandia</i>	<i>dockrillii</i>	In pots
Euphorbiaceae	<i>Macaranga</i>	<i>mallotoides</i>	Grows very easily
Euphorbiaceae	<i>Macaranga</i>	<i>polyadenia</i>	Similar to subdentatus but ramiflorous
Euphorbiaceae	<i>Macaranga</i>	<i>subdentata</i>	Grows slowly at first until established
Euphorbiaceae	<i>Macaranga</i>	<i>tanarius</i>	Grows simply
Euphorbiaceae	<i>Mallotus</i>	<i>claoxyloides</i>	Grows slowly, dislike wet conditions
Euphorbiaceae	<i>Mallotus</i>	<i>discolor</i>	Grows easily
Euphorbiaceae	<i>Mallotus</i>	<i>ficifolius</i>	Large leaves, in pots
Euphorbiaceae	<i>Mallotus</i>	<i>mollissimus</i>	Grows well
Euphorbiaceae	<i>Mallotus</i>	<i>nesophilus</i>	Grows slowly but well
Euphorbiaceae	<i>Mallotus</i>	<i>paniculatus</i>	Grows too well- has escaped
Euphorbiaceae	<i>Mallotus</i>	<i>philippensis</i>	Easy

Euphorbiaceae	<i>Mallotus</i>	<i>polyadenos</i>	Slow but steady growth
Euphorbiaceae	<i>Omphalea</i>	<i>celata</i>	Fast growing
Euphorbiaceae	<i>Omphalea</i>	<i>queenslandiae</i>	In a pot- fast growing
Euphorbiaceae	<i>Petalostigma</i>	<i>pubescens</i>	Steady grower
Euphorbiaceae	<i>Petalostigma</i>	<i>triloculare</i>	Steady
Euphorbiaceae	<i>Phyllanthus</i>	<i>albiflorus</i>	Slowly dying out in shade
Euphorbiaceae	<i>Phyllanthus</i>	<i>cuscutiflorus</i>	Grows easily
Euphorbiaceae	<i>Phyllanthus</i>	<i>lamprophyllus</i>	Grows well
Euphorbiaceae	<i>Phyllanthus</i>	sp. Bulburin (P.I.Forster+ PIF16034)	Growing well
Euphorbiaceae	<i>Rockinghamia</i>	<i>angustifolia</i>	Grows well
Euphorbiaceae	<i>Sankowskya</i>	<i>stipularis</i>	Easy to grow, amazing new growth
Euphorbiaceae	<i>Sauropus</i>	<i>macranthus</i>	Grows well once established, needs shelter
Euphorbiaceae	<i>Suregada</i>	<i>glomerulata</i>	Dislikes these southern latitudes
Euphorbiaceae	<i>Whyanbeelia</i>	<i>terrae-reginae</i>	Grows easily
Eupomatiaceae	<i>Eupomatia</i>	<i>barbata</i>	Grows well, fruits at 10cm tall !
Eupomatiaceae	<i>Eupomatia</i>	<i>bennettii</i>	Dies off and grows again!
Fabaceae	<i>Callerya</i>	<i>australis</i>	Easy
Fabaceae	<i>Callerya</i>	<i>megasperma</i>	Easy
Fabaceae	<i>Callerya</i>	<i>pilipes</i>	Needs more sun
Fabaceae	<i>Callerya</i>	sp. aff. <i>australis</i>	At base of Jagera
Fabaceae	<i>Callerya</i>	sp. Beatrice River (10487)	Recently planted
Fabaceae	<i>Castanospermum</i>	<i>australe</i>	Easy, steady grower
Fabaceae	<i>Desmodium</i>	<i>acanthocladum</i>	Easy
Fabaceae	<i>Erythrina</i>	<i>insularis</i>	Just planted, growing well
Fabaceae	<i>Erythrina</i>	sp. "Croftby" (PIF6209)	Grows fast
Fabaceae	<i>Erythrina</i>	<i>variegata</i>	Grows surprisingly well
Fabaceae	<i>Erythrina</i>	<i>vespertilio</i>	Grows amazingly fast and big!
Fabaceae	<i>Hanslia</i>	<i>adhaerens</i>	Partial success
Fabaceae	<i>Hovea</i>	<i>acutifolia</i>	Grows well
Fabaceae	<i>Kennedia</i>	<i>rubicunda</i>	A native weed
Fabaceae	<i>Millettia</i>	<i>pinnata</i>	Grows well- strictly a maritime species
Fabaceae	<i>Millettia</i>	sp. probably exotic	Grows well
Fabaceae	<i>Millettia</i>	sp. Riverine species NQ	Grows easily
Fabaceae	<i>Ormosia</i>	<i>ormondii</i>	Difficult and slow
Fabaceae	<i>Sophora</i>	<i>fraseri</i>	Just planted
Fabaceae	<i>Sophora</i>	<i>tomentosa</i> subsp. <i>australis</i>	Recently planted

Flacourtiaceae	<i>Casearia</i>	<i>dallachii</i>	Steady grower
Flacourtiaceae	<i>Casearia</i>	<i>grewiifolia</i> var. <i>gelonioides</i>	In pots
Flacourtiaceae	<i>Casearia</i>	<i>multinervosa</i>	In pots, growing well from root suckers
Flacourtiaceae	<i>Flacourtia</i>	sp. "Shiptons Flat" (GJD3200)	Grows bushy when given room
Flacourtiaceae	<i>Homalium</i>	<i>circumpinnatum</i>	Grows easily
Flacourtiaceae	<i>Ryparosa</i>	sp. aff. <i>javanica</i>	Slow in ground, fast in pots
Flacourtiaceae	<i>Scolopia</i>	<i>braunii</i>	Grows well
Flacourtiaceae	<i>Xylosma</i>	<i>terrae-reginae</i>	Grows well once established
Gentianaceae	<i>Fagraea</i>	<i>berteroana</i>	Easy
Gentianaceae	<i>Fagraea</i>	<i>cambagei</i>	Slow but grows well
Gentianaceae	<i>Fagraea</i>	<i>gracilipes</i>	Easy
Goodeniaceae	<i>Scaevola</i>	<i>taccada</i>	Grows well in summer
Grossulariaceae	<i>Anopterus</i>	<i>macleayanus</i>	Grows well in the shade with water
Grossulariaceae	<i>Argophyllum</i>	<i>cryptophlebium</i>	Surprisingly easy, in shade
Grossulariaceae	<i>Argophyllum</i>	<i>lejourdanii</i>	Easy to grow
Grossulariaceae	<i>Argophyllum</i>	<i>nullumense</i>	Local, Eungella and Paluma forms
Grossulariaceae	<i>Argophyllum</i>	sp. Boulders	Easy to grow
Grossulariaceae	<i>Argophyllum</i>	sp. Eungella	Lumped in with nullumense
Grossulariaceae	<i>Argophyllum</i>	sp. Koolmoon Creek	Grows easily
Grossulariaceae	<i>Argophyllum</i>	sp. Paluma Range	Recently planted
Grossulariaceae	<i>Argophyllum</i>	sp. Rex Range	Recently planted
Grossulariaceae	<i>Argophyllum</i>	<i>verae</i>	Grows well in shade
Hamamelidaceae	<i>Neostrearia</i>	<i>fleckeri</i>	Slow at first
Hamamelidaceae	<i>Noahdendron</i>	<i>nicholasii</i>	Slow to establish, needs water
Hamamelidaceae	<i>Ostrearia</i>	<i>australiana</i>	Easy
Hernandiaceae	<i>Gyrocarpus</i>	<i>americanus</i> subsp. <i>americanus</i>	On the way out, needs more sun, try again
Hernandiaceae	<i>Hernandia</i>	<i>bivalvis</i>	Fast
Hernandiaceae	<i>Hernandia</i>	<i>nymphaeifolia</i>	Slow, possibly not a long term project
Icacinaceae	<i>Irvingbaileya</i>	<i>australis</i>	Requires shade
Icacinaceae	<i>Pennantia</i>	<i>cunninghamii</i>	Grows well, likes protection
Idiospermaceae	<i>Idiospermum</i>	<i>australiense</i>	Grows well, likes partial shade
Lamiaceae	<i>Callicarpa</i>	<i>brevistyla</i>	Large growing, doesn't set seed
Lamiaceae	<i>Callicarpa</i>	<i>candicans</i>	Grows well
Lamiaceae	<i>Callicarpa</i>	<i>longifolia</i>	Grows well, birds eat fruit
Lamiaceae	<i>Clerodendrum</i>	<i>inermis</i>	Slow, likes coastal climates
Lamiaceae	<i>Faradaya</i>	<i>splendida</i>	Fast growing

Lamiaceae	<i>Gmelina</i>	<i>dalrympleana</i>	Fast in first year, attractive species. Fruits
Lamiaceae	<i>Gmelina</i>	<i>fasciculiflora</i>	Very fast. Fruits
Lamiaceae	<i>Gmelina</i>	<i>leichhardtii</i>	Moderately fast
Lamiaceae	<i>Gmelina</i>	<i>schlecteri</i>	Fast in first year, attractive species
Lamiaceae	<i>Orthosiphon</i>	<i>aristatus</i>	Easy, mauve form more persistent
Lamiaceae	<i>Plectranthus</i>	"Bloomfield Falls"	Easy
Lamiaceae	<i>Plectranthus</i>	"Mount Carbine"	Easy
Lamiaceae	<i>Plectranthus</i>	"Russell River"	Easy
Lamiaceae	<i>Plectranthus</i>	<i>actites</i>	Easy
Lamiaceae	<i>Plectranthus</i>	<i>alloplectus</i>	Easy
Lamiaceae	<i>Plectranthus</i>	<i>apreptus</i>	Easy
Lamiaceae	<i>Plectranthus</i>	<i>argentatus</i>	Easy
Lamiaceae	<i>Plectranthus</i>	<i>cremnus</i>	Easy
Lamiaceae	<i>Plectranthus</i>	<i>glabrescens</i>	Easy
Lamiaceae	<i>Plectranthus</i>	<i>leiperi</i>	Easy
Lamiaceae	<i>Plectranthus</i>	<i>nitidus</i>	Likes a little shade
Lamiaceae	<i>Plectranthus</i>	<i>parviflorus</i>	Easy
Lamiaceae	<i>Plectranthus</i>	sp. "Garrawaye Hill"	Easy
Lamiaceae	<i>Plectranthus</i>	sp. "Koonyum Range"	Easy
Lamiaceae	<i>Plectranthus</i>	sp. "Tweed Pinnacle"	Easy
Lamiaceae	<i>Plectranthus</i>	sp. Lake Morris Road	Easy
Lamiaceae	<i>Premna</i>	<i>serratifolia</i>	Nice plant attract butterflies
Lamiaceae	<i>Prostanthera</i>	<i>phyllicifolia</i>	Nice plant- short lived
Lamiaceae	<i>Spartothamnella</i>	<i>juncea</i>	Grows into a mess
Lamiaceae	<i>Vitex</i>	<i>melicopea</i>	Easy to grow
Lamiaceae	<i>Viticipremna</i>	<i>queenslandica</i>	Easy to grow
Lauraceae	<i>Beilschmiedia</i>	<i>bancroftii</i>	Slow growing
Lauraceae	<i>Beilschmiedia</i>	<i>brunnea</i>	Fast in the pot- havent planted yet
Lauraceae	<i>Beilschmiedia</i>	<i>castrisinensis</i>	Slow growing
Lauraceae	<i>Beilschmiedia</i>	<i>obtusifolia</i>	Slow growing
Lauraceae	<i>Beilschmiedia</i>	<i>peninsularis</i>	Slow growing
Lauraceae	<i>Beilschmiedia</i>	<i>tooram</i>	Mod slow growing
Lauraceae	<i>Beilschmiedia</i>	<i>volckii</i>	Recently planted
Lauraceae	<i>Cinnamomum</i>	<i>oliveri</i>	Grows well
Lauraceae	<i>Cinnamomum</i>	<i>propinquum</i>	Difficult to grow well
Lauraceae	<i>Cinnamomum</i>	<i>virens</i>	Difficult to establish

Lauraceae	<i>Cryptocarya</i>	<i>bellendenkerana</i>	Slow growing
Lauraceae	<i>Cryptocarya</i>	<i>bidwillii</i>	Just planted 3/05
Lauraceae	<i>Cryptocarya</i>	<i>brassii</i>	Grows well. Flowered
Lauraceae	<i>Cryptocarya</i>	<i>burckiana</i>	Mod grower. Flowered
Lauraceae	<i>Cryptocarya</i>	<i>clarksoniana</i>	Just planted 3/05
Lauraceae	<i>Cryptocarya</i>	<i>claudiana</i>	Grows well
Lauraceae	<i>Cryptocarya</i>	<i>corrugata</i>	Grows tall and fast
Lauraceae	<i>Cryptocarya</i>	<i>cunninghamii</i>	Grows well
Lauraceae	<i>Cryptocarya</i>	<i>endiandrifolia</i>	Grows well
Lauraceae	<i>Cryptocarya</i>	<i>erythroxylon</i>	Grows slowly
Lauraceae	<i>Cryptocarya</i>	<i>foetida</i>	Grows slowly but well
Lauraceae	<i>Cryptocarya</i>	<i>glaucescens</i>	Grows steadily, bushy
Lauraceae	<i>Cryptocarya</i>	<i>grandis</i>	Grows slowly but well
Lauraceae	<i>Cryptocarya</i>	<i>hypospodia</i>	Grows fast
Lauraceae	<i>Cryptocarya</i>	<i>laevigata</i>	Grows slowly
Lauraceae	<i>Cryptocarya</i>	<i>leucophylla</i>	Just planted 3/05
Lauraceae	<i>Cryptocarya</i>	<i>lividula</i>	Grows moderately easy
Lauraceae	<i>Cryptocarya</i>	<i>macdonaldii</i>	Grows slowly
Lauraceae	<i>Cryptocarya</i>	<i>mackinnoniana</i>	Grows well
Lauraceae	<i>Cryptocarya</i>	<i>meisneriana</i>	Dorrigo and Caldera form, poor growers
Lauraceae	<i>Cryptocarya</i>	<i>murrayi</i>	Grows easy
Lauraceae	<i>Cryptocarya</i>	<i>obovata</i>	Grows easy
Lauraceae	<i>Cryptocarya</i>	<i>onoprienkoana</i>	Grows well
Lauraceae	<i>Cryptocarya</i>	<i>pleurosperma</i>	Grows steadily
Lauraceae	<i>Cryptocarya</i>	<i>rhodosperma</i>	Grows well
Lauraceae	<i>Cryptocarya</i>	<i>rigida</i>	Easy growing
Lauraceae	<i>Cryptocarya</i>	<i>saccharata</i>	Easy growing
Lauraceae	<i>Cryptocarya</i>	<i>sclerophylla</i>	Easy growing
Lauraceae	<i>Cryptocarya</i>	<i>triplinervis</i> var. <i>riparia</i>	Mod grower, prone to caterpillars
Lauraceae	<i>Cryptocarya</i>	<i>triplinervis</i> var. <i>triplinervis</i>	Slow grower
Lauraceae	<i>Cryptocarya</i>	<i>vulgaris</i>	Mod grower
Lauraceae	<i>Cryptocarya</i>	<i>williwilliana</i>	Mod grower, not fast
Lauraceae	<i>Endiandra</i>	<i>anthropophagorum</i>	Dislikes full sun, slow growing
Lauraceae	<i>Endiandra</i>	<i>bessaphila</i>	Grows steadily
Lauraceae	<i>Endiandra</i>	<i>compressa</i>	Grows well but slowly
Lauraceae	<i>Endiandra</i>	<i>cooperana</i>	Recently planted

Lauraceae	<i>Endiandra</i>	<i>cowleyana</i>	Grows fast
Lauraceae	<i>Endiandra</i>	<i>dichrophylla</i>	In pots, growing well
Lauraceae	<i>Endiandra</i>	<i>floydii</i>	Grows easily. Fruits
Lauraceae	<i>Endiandra</i>	<i>glauca</i>	Grows well, epicormic basal buds
Lauraceae	<i>Endiandra</i>	<i>globosa</i>	Grows well (NSW and NEQLD)
Lauraceae	<i>Endiandra</i>	<i>grayi</i>	Grows steadily
Lauraceae	<i>Endiandra</i>	<i>hayesii</i>	Grows well
Lauraceae	<i>Endiandra</i>	<i>hypotephra</i>	Grows steadily
Lauraceae	<i>Endiandra</i>	<i>impressicosta</i>	Grows easily
Lauraceae	<i>Endiandra</i>	<i>insignis</i>	Grows well
Lauraceae	<i>Endiandra</i>	<i>introrsa</i>	Grows slowly, slow to establish
Lauraceae	<i>Endiandra</i>	<i>jonesii</i>	Grows slowly, just planted another
Lauraceae	<i>Endiandra</i>	<i>leptodendron</i>	Grows slowly
Lauraceae	<i>Endiandra</i>	<i>longipedicellata</i>	Grows easily
Lauraceae	<i>Endiandra</i>	<i>microneura</i>	Grows easily
Lauraceae	<i>Endiandra</i>	<i>monothyra</i> subsp. <i>monothyra</i>	Grows well
Lauraceae	<i>Endiandra</i>	<i>montana</i>	Grows easily
Lauraceae	<i>Endiandra</i>	<i>muelleri</i> subsp. <i>bracteata</i>	Grows well, attractive leaves
Lauraceae	<i>Endiandra</i>	<i>muelleri</i> subsp. <i>muelleri</i>	Grows well, prone to borers
Lauraceae	<i>Endiandra</i>	<i>palmerstonii</i>	Grows slowly at first
Lauraceae	<i>Endiandra</i>	<i>pubens</i>	Grows slowly at first
Lauraceae	<i>Endiandra</i>	<i>sankeyana</i>	Grows fast at first
Lauraceae	<i>Endiandra</i>	<i>sideroxylon</i>	Grows well
Lauraceae	<i>Endiandra</i>	<i>sieberi</i>	Grows horribly, need a few more!
Lauraceae	<i>Endiandra</i>	sp. "Home Rule"	Grows steadily, certainly a different sp.
Lauraceae	<i>Endiandra</i>	<i>virens</i>	Grows slowly but steadily
Lauraceae	<i>Endiandra</i>	<i>wolfei</i>	Grows well
Lauraceae	<i>Lindera</i>	<i>queenslandica</i>	Grows not much
Lauraceae	<i>Litsea</i>	<i>breviumbellata</i>	Just planted
Lauraceae	<i>Litsea</i>	<i>fawcettiana</i>	Grows easily
Lauraceae	<i>Litsea</i>	<i>leefeana</i>	Grows easily
Lauraceae	<i>Neolitsea</i>	<i>australiensis</i>	Grows slowly
Lauraceae	<i>Neolitsea</i>	<i>brassii</i>	Grows slow at first
Lauraceae	<i>Neolitsea</i>	<i>dealbata</i>	Grows easily
Lecythidaceae	<i>Barringtonia</i>	<i>acutangula</i> subsp. <i>acutangula</i>	Mod fast growing. Flowers
Lecythidaceae	<i>Barringtonia</i>	<i>calyptrata</i>	Fast growing. Flowers

Lecythidaceae	<i>Barringtonia</i>	<i>racemosa</i>	Recently planted
Leeaceae	<i>Leea</i>	<i>indica</i>	Grows well, long term?
Lythraceae	<i>Lagerstroemia</i>	<i>archeriana</i>	Grows easily
Malvaceae	<i>Abutilon</i>	<i>auritum</i>	Grows well
Malvaceae	<i>Gossypium</i>	<i>sturtianum</i>	Grows well, may not live long
Malvaceae	<i>Hibiscus</i>	<i>divaricatus</i>	Grows easily
Malvaceae	<i>Hibiscus</i>	<i>diversifolius</i>	Easy
Malvaceae	<i>Hibiscus</i>	<i>forsteri</i>	Just planted, grows well
Malvaceae	<i>Hibiscus</i>	<i>geranioides</i>	Easy
Malvaceae	<i>Hibiscus</i>	<i>heterophyllus</i>	Easy
Malvaceae	<i>Hibiscus</i>	<i>insularis</i>	Easy
Malvaceae	<i>Hibiscus</i>	<i>splendens</i>	Easy
Malvaceae	<i>Macrostelia</i>	<i>grandifolia</i> subsp. <i>grandifolia</i>	Grows well
Malvaceae	<i>Macrostelia</i>	sp. Bolt Head (P.I.Forster PIF8937)	Grows well, flower always
Malvaceae	<i>Thespesia</i>	<i>populnea</i>	Grows well
Melastomataceae	<i>Medinilla</i>	<i>balls-headleyi</i>	Needs more water
Melastomataceae	<i>Melastoma</i>	<i>malabathricum</i> (white and mauve flower)	Grows easy
Melastomataceae	<i>Memecylon</i>	<i>pauciflorum</i> var. <i>pauciflorum</i>	Slow but healthy
Meliaceae	<i>Aglaia</i>	<i>argentea</i>	Recently planted
Meliaceae	<i>Aglaia</i>	<i>brownii</i>	Recently planted
Meliaceae	<i>Aglaia</i>	<i>elaeagnoidea</i>	Slow
Meliaceae	<i>Aglaia</i>	<i>euryanthera</i>	Slow
Meliaceae	<i>Aglaia</i>	<i>meridionalis</i>	Grows well
Meliaceae	<i>Aglaia</i>	<i>rufa</i>	Recently planted
Meliaceae	<i>Aglaia</i>	<i>sapindina</i>	Recently planted
Meliaceae	<i>Anthocarapa</i>	<i>nitidula</i>	Grows slowly
Meliaceae	<i>Dysoxylum</i>	<i>alliaceum</i>	Slow, but Ok
Meliaceae	<i>Dysoxylum</i>	<i>fraserianum</i>	Good growth rate
Meliaceae	<i>Dysoxylum</i>	<i>gaudichaudianum</i>	Grows fast
Meliaceae	<i>Dysoxylum</i>	<i>mollissimum</i> subsp. <i>molle</i>	Easy (NQ and local)
Meliaceae	<i>Dysoxylum</i>	<i>papuanum</i>	Difficult to grow well, but should eventually
Meliaceae	<i>Dysoxylum</i>	<i>parasiticum</i>	Easy. Fruits
Meliaceae	<i>Dysoxylum</i>	<i>pettigrewianum</i>	Needs full sun
Meliaceae	<i>Dysoxylum</i>	<i>rufum</i>	Relatively easy
Meliaceae	<i>Melia</i>	<i>azedarach</i>	Grows easy
Meliaceae	<i>Owenia</i>	<i>cepiodora</i>	Can be slow

Meliaceae	<i>Owenia</i>	<i>venosa</i>	Slow as a snail
Meliaceae	<i>Synoum</i>	<i>glandulosum</i> subsp. <i>glandulosum</i>	Grows well
Meliaceae	<i>Synoum</i>	<i>glandulosum</i> subsp. <i>paniculosum</i>	Grows well
Meliaceae	<i>Toona</i>	<i>ciliata</i>	Easy
Meliaceae	<i>Vavaea</i>	<i>amicorum</i>	Slow
Mimosaceae	<i>Acacia</i>	<i>bakeri</i>	Grows steadily
Mimosaceae	<i>Acacia</i>	<i>cincinnata</i>	Grows easily-down bottom planting
Mimosaceae	<i>Acacia</i>	<i>elata</i>	Easy to grow and fast, but big
Mimosaceae	<i>Acacia</i>	<i>hubbardiana</i>	Small shrub, easy to grow
Mimosaceae	<i>Acacia</i>	<i>mangium</i>	Fast, large 'leaves', needs sun
Mimosaceae	<i>Acacia</i>	<i>melanoxylon</i>	Easy, local native
Mimosaceae	<i>Acacia</i>	<i>orites</i>	Easy
Mimosaceae	<i>Adenantha</i>	<i>pavonina</i>	Easy
Mimosaceae	<i>Albizia</i>	sp. Windsor Tableland	Difficult to establish
Mimosaceae	<i>Archidendron</i>	<i>grandiflorum</i>	Grows well
Mimosaceae	<i>Archidendron</i>	<i>hendersonii</i>	Local and NQLD (which is different)
Mimosaceae	<i>Archidendron</i>	<i>hirsutum</i>	Grows well and flowers
Mimosaceae	<i>Archidendron</i>	<i>kanisii</i>	Recently planted
Mimosaceae	<i>Archidendron</i>	<i>lucyi</i>	Grows well if not crowded
Mimosaceae	<i>Archidendron</i>	<i>muellerianum</i>	Slow growing, best in sun
Mimosaceae	<i>Archidendron</i>	<i>ramiflorum</i>	Mod growing
Mimosaceae	<i>Archidendron</i>	<i>vallantii</i>	Slow growing
Mimosaceae	<i>Archidendron</i>	<i>whitei</i>	Slow growing in shade, better within a gap
Mimosaceae	<i>Archidendropsis</i>	<i>thozetiana</i>	Weird tree
Mimosaceae	<i>Archidendropsis</i>	<i>xanthoxylon</i>	Poor specimen, slow growing
Mimosaceae	<i>Cathormion</i>	<i>umbellatum</i>	Prickly. Steady grower, needs sun
Mimosaceae	<i>Pararchidendron</i>	<i>pruinatum</i>	Grows easily
Mimosaceae	<i>Paraserianthes</i>	<i>toona</i>	Fast growing
Monimaceae	<i>Austromatthaea</i>	<i>elegans</i>	Slow growing
Monimaceae	<i>Hedycarya</i>	<i>loxocarya</i>	Slow growing but well
Monimaceae	<i>Kibara</i>	<i>rigidifolia</i>	Grows slowly but well
Monimiaceae	<i>Tetrasynandra</i>	<i>laxiflora</i>	Recently planted
Monimiaceae	<i>Tetrasynandra</i>	<i>longipes</i>	Recently planted
Monimiaceae	<i>Tetrasynandra</i>	<i>pubescens</i>	In a pot
Monimiaceae	<i>Wilkiea</i>	<i>angustifolia</i>	Grows steadily
Monimiaceae	<i>Wilkiea</i>	<i>austroqueenslandica</i>	Easy to grow, slow-moderate

Monimiaceae	<i>Wilkiea</i>	<i>huegeliana</i>	Easy, self natural recruits
Monimiaceae	<i>Wilkiea</i>	<i>macrophylla</i>	Attractive species
Monimiaceae	<i>Wilkiea</i>	sp. aff <i>macrophylla</i> NQ	Dislikes full sun, slow growing
Monimiaceae	<i>Wilkiea</i>	sp. Russell Gorge (S.J.Dansie 1909)	Recently planted, new growth produced
Moraceae	<i>Ficus</i>	<i>albipila</i> var. <i>albipila</i>	Fast growing, large tree
Moraceae	<i>Ficus</i>	<i>benjamina</i> var. <i>benjamina</i>	Fast growing
Moraceae	<i>Ficus</i>	<i>congesta</i> var. <i>congesta</i>	Easy and bushy
Moraceae	<i>Ficus</i>	<i>copiosa</i>	Easy, prone to beetle attack
Moraceae	<i>Ficus</i>	<i>coronata</i>	Natural recruits
Moraceae	<i>Ficus</i>	<i>coronulata</i>	Slow, likes warmth but doing well
Moraceae	<i>Ficus</i>	<i>crassipes</i>	Easy
Moraceae	<i>Ficus</i>	<i>destruens</i>	Easy
Moraceae	<i>Ficus</i>	<i>drupacea</i> var. <i>drupacea</i>	Easy
Moraceae	<i>Ficus</i>	<i>fraseri</i>	Easy
Moraceae	<i>Ficus</i>	<i>hispida</i> var. <i>hispida</i>	Easy, defoliates in dry-cold
Moraceae	<i>Ficus</i>	<i>leptoclada</i>	Easy
Moraceae	<i>Ficus</i>	<i>microcarpa</i> var. <i>microcarpa</i>	Easy
Moraceae	<i>Ficus</i>	<i>mollior</i> var. <i>mollior</i>	Wallabies munched it but doing well now
Moraceae	<i>Ficus</i>	<i>nodosa</i>	Fast growing
Moraceae	<i>Ficus</i>	<i>obliqua</i>	Quick growing, natural plants
Moraceae	<i>Ficus</i>	<i>opposita</i> var. <i>opposita</i>	Easy and quick
Moraceae	<i>Ficus</i>	<i>pantoniana</i> var. <i>pantoniana</i>	Grows easily in shade. Interesting plant for Australia
Moraceae	<i>Ficus</i>	<i>platypoda</i>	Grows with no trouble
Moraceae	<i>Ficus</i>	<i>pleurocarpa</i>	Easy, grows large
Moraceae	<i>Ficus</i>	<i>racemosa</i> var. <i>racemosa</i>	Easy to grow
Moraceae	<i>Ficus</i>	<i>rubiginosa</i> "Little Ruby"	Just planted
Moraceae	<i>Ficus</i>	<i>scobina</i>	Larger alternate leaves
Moraceae	<i>Ficus</i>	<i>septica</i> var. <i>septica</i>	Spreads and becomes very bushy
Moraceae	<i>Ficus</i>	<i>subnervosa</i>	Grows slowly, 4 month growing season
Moraceae	<i>Ficus</i>	<i>triradiata</i>	Grows easily. Fruits
Moraceae	<i>Ficus</i>	<i>variegata</i> var. <i>variegata</i>	Grows simply- dislikes cold when young
Moraceae	<i>Ficus</i>	<i>virens</i> var. <i>sublanceolata</i>	Grows well, natural plants
Moraceae	<i>Ficus</i>	<i>virgata</i> var. <i>virgata</i>	Grows easily
Moraceae	<i>Ficus</i>	<i>watkinsiana</i>	Very successful, natural plants
Moraceae	<i>Maclura</i>	<i>cochinchinensis</i>	Natural recruits
Moraceae	<i>Streblus</i>	<i>brunonianus</i>	Moderate grower

Myristicaceae	<i>Horsfieldia</i>	<i>australasica</i>	Difficult- dislikes the subtropics
Myristicaceae	<i>Myristica</i>	<i>globosa</i> subsp. <i>muelleri</i>	Moderately slow at first, over 2m tall
Myrsinaceae	<i>Ardisia</i>	<i>pachyrrhachis</i>	Hates drying out, flowers though
Myrsinaceae	<i>Embelia</i>	<i>australiana</i>	Natural recruits
Myrsinaceae	<i>Rapanea</i>	sp. Cape York	Easy to grow. Slow to establish
Myrsinaceae	<i>Rapanea</i>	<i>subsessilis</i>	Easy to grow in shade
Myrsinaceae	<i>Rapanea</i>	<i>variabilis</i>	Self recruits
Myrtaceae	<i>Acmena</i>	<i>divaricata</i>	Easier than <i>A. graveolens</i>
Myrtaceae	<i>Acmena</i>	<i>graveolens</i>	Slow to establish, needs water
Myrtaceae	<i>Acmena</i>	<i>hemilampra</i> subsp. <i>hemilampra</i>	Moderate growth rate
Myrtaceae	<i>Acmena</i>	<i>hemilampra</i> subsp. <i>orophila</i>	Smaller leaves than typical form
Myrtaceae	<i>Acmena</i>	<i>ingens</i>	Moderate growth rate, easy
Myrtaceae	<i>Acmena</i>	<i>mackinnoniana</i>	Moderate growth rate, bushy
Myrtaceae	<i>Acmena</i>	<i>resa</i>	Moderate growth rate, upright habit
Myrtaceae	<i>Acmena</i>	<i>smithii</i>	Coastal, local and rheophtic forms
Myrtaceae	<i>Acmenosperma</i>	<i>claviflorum</i>	Moderate growth rate, mod. easy
Myrtaceae	<i>Allosyncarpia</i>	<i>ternata</i>	Bushy, slow growing
Myrtaceae	<i>Anetholea</i>	<i>anisata</i>	Mod fast growing
Myrtaceae	<i>Archirhodomyrtus</i>	<i>beckleri</i>	Self recruits
Myrtaceae	<i>Backhousia</i>	<i>angustifolia</i>	Slow growing
Myrtaceae	<i>Backhousia</i>	<i>bancroftii</i>	Easy to grow, dry stresses though
Myrtaceae	<i>Backhousia</i>	<i>citriodora</i>	Mod fast growing, check genera
Myrtaceae	<i>Backhousia</i>	<i>enata</i>	Easy and bushy (syn sp. Tully Gorge)
Myrtaceae	<i>Backhousia</i>	<i>hughesii</i>	Easy to grow
Myrtaceae	<i>Backhousia</i>	<i>sciadophora</i>	Easy to grow
Myrtaceae	<i>Barongia</i>	<i>lophandra</i>	Mod fast growing. Flowers
Myrtaceae	<i>Callistemon</i>	<i>recurvus</i>	Easy to grow
Myrtaceae	<i>Callistemon</i>	<i>viminalis</i>	Easy to grow
Myrtaceae	<i>Choricarpia</i>	<i>leptopetala</i>	Nice bushy plant
Myrtaceae	<i>Choricarpia</i>	<i>subargentea</i>	Recently planted
Myrtaceae	<i>Corymbia</i>	<i>intermedia</i>	Natural recruits
Myrtaceae	<i>Corymbia</i>	<i>ptychocarpa</i>	Grows well
Myrtaceae	<i>Decaspermum</i>	<i>humile</i>	Easy, self recruit
Myrtaceae	<i>Eucalyptus</i>	<i>brassiana</i>	Grows well, squat tree, flowers
Myrtaceae	<i>Eucalyptus</i>	<i>grandis</i>	Natural recruits
Myrtaceae	<i>Eugenia</i>	<i>reinwardtiana</i>	Grows slowly but easily

Myrtaceae	<i>Eugenia</i>	sp. "Mulgrave River"	Small leaves, grows well
Myrtaceae	<i>Gossia</i>	<i>acmenoides</i>	Slow growing
Myrtaceae	<i>Gossia</i>	<i>bamagensis</i> (ex Bolt Head)	Grows slowly, rounded leaves
Myrtaceae	<i>Gossia</i>	<i>bidwillii</i>	Self occurring
Myrtaceae	<i>Gossia</i>	<i>dallachiana</i>	Slow growing but fruits
Myrtaceae	<i>Gossia</i>	<i>floribunda</i>	Easy growing
Myrtaceae	<i>Gossia</i>	<i>fragrantissima</i>	Slow growing
Myrtaceae	<i>Gossia</i>	<i>gonoclada</i>	Slow growing
Myrtaceae	<i>Gossia</i>	<i>hillii</i>	Self occurring
Myrtaceae	<i>Gossia</i>	<i>myrsinocarpa</i>	Grows well (ex <i>A. minutiflora</i>)
Myrtaceae	<i>Lenwebbia</i>	<i>prominens</i>	Grows well (ex Upper Mudgeeraba crk)
Myrtaceae	<i>Leptospermum</i>	<i>wooroonooran</i>	Likes an open location
Myrtaceae	<i>Lindsayomyrtus</i>	<i>racemoides</i>	Grows well when given water
Myrtaceae	<i>Lithomyrtus</i>	<i>obtusa</i>	Grows well, attractive in flower
Myrtaceae	<i>Lophostemon</i>	<i>confertus</i>	Easy as pie
Myrtaceae	<i>Melaleuca</i>	<i>leucadendra</i>	Grows easily
Myrtaceae	<i>Melaleuca</i>	<i>quinquenervia</i>	Grows easily
Myrtaceae	<i>Melaleuca</i>	<i>stypelioides</i>	Grows easily
Myrtaceae	<i>Melaleuca</i>	<i>viridiflora</i>	Grows well, flowers very ornamental
Myrtaceae	<i>Mitranthia</i>	<i>bilocularis</i>	Grows very well
Myrtaceae	<i>Pilidiostigma</i>	<i>glabrum</i>	Grows easily
Myrtaceae	<i>Pilidiostigma</i>	<i>glabrum</i> "Narrow leaved form"	Easy
Myrtaceae	<i>Pilidiostigma</i>	<i>recurvum</i>	Slow and difficult
Myrtaceae	<i>Pilidiostigma</i>	<i>rhytispermum</i>	Grows easily
Myrtaceae	<i>Pilidiostigma</i>	<i>tropicum</i>	Grows very well
Myrtaceae	<i>Rhodamnia</i>	<i>argentea</i>	Moderate grower
Myrtaceae	<i>Rhodamnia</i>	<i>australis</i>	Easy to grow
Myrtaceae	<i>Rhodamnia</i>	<i>blairiana</i>	Grows slowly but successfully
Myrtaceae	<i>Rhodamnia</i>	<i>costata</i>	Attractive species
Myrtaceae	<i>Rhodamnia</i>	<i>dumicola</i>	Grows moderately well
Myrtaceae	<i>Rhodamnia</i>	<i>longisepala</i>	Cousin of <i>rubescens</i> , grows well
Myrtaceae	<i>Rhodamnia</i>	<i>maideniana</i>	Moderate grower
Myrtaceae	<i>Rhodamnia</i>	<i>rubescens</i>	Easy to grow
Myrtaceae	<i>Rhodamnia</i>	<i>sessiliflora</i>	Easy
Myrtaceae	<i>Rhodamnia</i>	<i>spongiosa</i>	Easy
Myrtaceae	<i>Rhodomyrtus</i>	<i>effusa</i>	Squat specimen, growing well

Myrtaceae	<i>Rhodomyrtus</i>	<i>macrocarpa</i>	Easy, needs warm site
Myrtaceae	<i>Rhodomyrtus</i>	<i>pervagata</i>	Easy
Myrtaceae	<i>Rhodomyrtus</i>	<i>psidioides</i>	Natural recruits
Myrtaceae	<i>Ristantia</i>	<i>pachysperma</i>	Grows fast and easily
Myrtaceae	<i>Ristantia</i>	<i>waterhousei</i>	Grows very well
Myrtaceae	<i>Sphaerantia</i>	<i>discolor</i>	Grows well and flowers
Myrtaceae	<i>Stockwellia</i>	<i>quadrifida</i>	Fast growing
Myrtaceae	<i>Syzygium</i>	<i>alatoramulum</i>	Grows easily
Myrtaceae	<i>Syzygium</i>	<i>alliligneum</i>	Easy, fruits
Myrtaceae	<i>Syzygium</i>	<i>angophoroides</i>	Easy, fruits
Myrtaceae	<i>Syzygium</i>	<i>apodophyllum</i>	Easy, needs shelter
Myrtaceae	<i>Syzygium</i>	<i>aqueum</i>	Easy, fruits heavily
Myrtaceae	<i>Syzygium</i>	<i>argyropedicum</i>	Difficult, needs warmth
Myrtaceae	<i>Syzygium</i>	<i>armstrongii</i>	Easy in sun
Myrtaceae	<i>Syzygium</i>	<i>australe</i>	Easy
Myrtaceae	<i>Syzygium</i>	<i>bamagense</i>	Easy, fruits
Myrtaceae	<i>Syzygium</i>	<i>banksii</i>	Tricky, needs warmth, but successful
Myrtaceae	<i>Syzygium</i>	<i>boonjee</i>	Easy in shelter
Myrtaceae	<i>Syzygium</i>	<i>branderhorstii</i>	Needs warmth, but grows well
Myrtaceae	<i>Syzygium</i>	<i>buettnerianum</i>	Grows well, likes northern aspect
Myrtaceae	<i>Syzygium</i>	<i>bungadinnia</i>	Thrives in full sun
Myrtaceae	<i>Syzygium</i>	<i>canicortex</i>	Easy
Myrtaceae	<i>Syzygium</i>	<i>cormiflorum</i>	Easy, flowers
Myrtaceae	<i>Syzygium</i>	<i>corynanthum</i>	Moderately slow but successful
Myrtaceae	<i>Syzygium</i>	<i>crebrinerve</i>	Grows well
Myrtaceae	<i>Syzygium</i>	<i>cryptophlebium</i>	Easy, fruits
Myrtaceae	<i>Syzygium</i>	<i>dansiei</i>	Grows well
Myrtaceae	<i>Syzygium</i>	<i>endophloium</i>	Grows well
Myrtaceae	<i>Syzygium</i>	<i>erythrocalyx</i>	Needs shelter, but doing well
Myrtaceae	<i>Syzygium</i>	<i>fibrosum</i>	Grows well
Myrtaceae	<i>Syzygium</i>	<i>forte</i> subsp. <i>forte</i>	Fruits
Myrtaceae	<i>Syzygium</i>	<i>forte</i> subsp. <i>potamophilum</i>	Grows well
Myrtaceae	<i>Syzygium</i>	<i>francisii</i>	Slow, but successful
Myrtaceae	<i>Syzygium</i>	<i>fratris</i>	Slow, flowers
Myrtaceae	<i>Syzygium</i>	<i>glenum</i>	Easy in shelter
Myrtaceae	<i>Syzygium</i>	<i>gustavioides</i>	Fruits

Myrtaceae	<i>Syzygium</i>	<i>hodgkinsoniae</i>	Difficult, but alive
Myrtaceae	<i>Syzygium</i>	<i>johnsonii</i>	Easy
Myrtaceae	<i>Syzygium</i>	<i>kuranda</i>	Slow at first
Myrtaceae	<i>Syzygium</i>	<i>luehmannii</i>	Easy (NQ and local)
Myrtaceae	<i>Syzygium</i>	<i>macilwraithianum</i>	Easy, fruits
Myrtaceae	<i>Syzygium</i>	<i>malaccense</i>	Needs warmth, but grows well
Myrtaceae	<i>Syzygium</i>	<i>maraca</i>	Easy. Syn sp. Noah crk-Towalla
Myrtaceae	<i>Syzygium</i>	<i>monimioides</i>	Slow but steady growth
Myrtaceae	<i>Syzygium</i>	<i>monospermum</i>	Easy
Myrtaceae	<i>Syzygium</i>	<i>moorei</i>	Easy
Myrtaceae	<i>Syzygium</i>	<i>nervosum</i>	Can be tricky, fine in the right spot
Myrtaceae	<i>Syzygium</i>	<i>oleosum</i>	Easy
Myrtaceae	<i>Syzygium</i>	<i>paniculatum</i>	Grows easily
Myrtaceae	<i>Syzygium</i>	<i>papyraceum</i>	Easy, fruits
Myrtaceae	<i>Syzygium</i>	<i>pseudofastigiatum</i>	Easy
Myrtaceae	<i>Syzygium</i>	<i>rubrimolle</i>	Easy, fruits
Myrtaceae	<i>Syzygium</i>	<i>sayeri</i>	Easy
Myrtaceae	<i>Syzygium</i>	sp. "Mount Mulligan" aff <i>luehmannii</i>	Easy
Myrtaceae	<i>Syzygium</i>	<i>suborbiculare</i>	Easy, moderately slow
Myrtaceae	<i>Syzygium</i>	<i>tierneyanum</i>	Easy
Myrtaceae	<i>Syzygium</i>	<i>trachyphloium</i>	Easy, fruits
Myrtaceae	<i>Syzygium</i>	<i>velarum</i>	Easy, fruits
Myrtaceae	<i>Syzygium</i>	<i>wesa</i>	Easy, slow growing
Myrtaceae	<i>Syzygium</i>	<i>wilsonii</i> subsp. <i>epigaeum</i>	Grows well
Myrtaceae	<i>Syzygium</i>	<i>wilsonii</i> subsp. <i>wilsonii</i>	Easy, flowers
Myrtaceae	<i>Syzygium</i>	<i>wilsonii</i> x <i>luehmannii</i>	Grows easily
Myrtaceae	<i>Syzygium</i>	<i>xerampelinum</i>	Easy in shelter
Myrtaceae	<i>Thaleropia</i>	<i>queenslandica</i>	Grows easily
Myrtaceae	<i>Tristaniopsis</i>	<i>collina</i>	Grows easily
Myrtaceae	<i>Tristaniopsis</i>	<i>exiliflora</i>	Grows easily
Myrtaceae	<i>Tristaniopsis</i>	<i>laurina</i>	Grows well
Myrtaceae	<i>Uromyrtus</i>	<i>lamingtonensis</i>	Grows well
Myrtaceae	<i>Uromyrtus</i>	<i>metrosideros</i>	Grows well
Myrtaceae	<i>Waterhousea</i>	<i>floribunda</i>	Fast growing
Myrtaceae	<i>Waterhousea</i>	<i>hedraiophylla</i>	Slow growing
Myrtaceae	<i>Waterhousea</i>	<i>mulgraveana</i>	Grows well

Myrtaceae	<i>Waterhousea</i>	sp. "Little Cooper Creek"	Grows easily
Myrtaceae	<i>Waterhousea</i>	sp. "Mount Lewis"	Grows easily
Myrtaceae	<i>Waterhousea</i>	<i>unipunctata</i>	Grows well, 2 forms
Myrtaceae	<i>Xanthostemon</i>	<i>arenarius</i>	Grows well, dislikes winter
Myrtaceae	<i>Xanthostemon</i>	<i>chrysanthus</i>	Grows well, 2 forms (NQ and Pascoe River)
Myrtaceae	<i>Xanthostemon</i>	<i>crenulatus</i>	Grows slowly but well
Myrtaceae	<i>Xanthostemon</i>	<i>eucalyptoides</i>	Grows well, leaves rot in cold weather
Myrtaceae	<i>Xanthostemon</i>	<i>formosus</i>	Grows surprisingly well
Myrtaceae	<i>Xanthostemon</i>	<i>graniticus</i>	Grows well
Myrtaceae	<i>Xanthostemon</i>	<i>oppositifolius</i>	Grows moderately fast
Myrtaceae	<i>Xanthostemon</i>	<i>paradoxus</i>	Slow growing
Myrtaceae	<i>Xanthostemon</i>	<i>psidioides</i>	Grows very well, grafted onto chrysanthus
Myrtaceae	<i>Xanthostemon</i>	sp. Bolt Head (J.R.Clarkson+ 8805)	Grows well
Myrtaceae	<i>Xanthostemon</i>	sp. Mt Tozer	Grows well
Myrtaceae	<i>Xanthostemon</i>	<i>umbrosus</i>	Grows well
Myrtaceae	<i>Xanthostemon</i>	<i>verticillatus</i>	Easy
Myrtaceae	<i>Xanthostemon</i>	<i>whitei</i>	Easy
Myrtaceae	<i>Xanthostemon</i>	<i>youngii</i>	Very difficult
Nyctaginaceae	<i>Pisonia</i>	<i>umbellifera</i>	Grows slowly
Oleaceae	<i>Chionanthus</i>	<i>axillaris</i>	Dislikes hot, dry weather
Oleaceae	<i>Chionanthus</i>	<i>ramiflora</i>	Easy growing
Oleaceae	<i>Chionanthus</i>	<i>sleumeri</i>	Grows steadily
Oleaceae	<i>Notelaea</i>	<i>longifolia</i> forma. <i>longifolia</i>	Grows slowly
Oleaceae	<i>Notelaea</i>	<i>microcarpa</i>	Grows slowly
Oleaceae	<i>Olea</i>	<i>paniculata</i>	Grows easily, many recruits
Orchidaceae	<i>Calanthe</i>	<i>triplicata</i>	Must refind plant
Orchidaceae	<i>Cymbidium</i>	<i>canaliculatum</i>	Easy, in tree
Orchidaceae	<i>Dendrobium</i>	<i>tetragonum</i>	Needs high humidity
Orchidaceae	<i>Dockrillia</i>	<i>linguiformis</i>	Grows easily
Orchidaceae	<i>Phaius</i>	<i>tancarvilleae</i>	Grows well in a pot
Pandanaceae	<i>Freycinetia</i>	<i>marginata</i>	In pots, dislikes drying out
Pandanaceae	<i>Freycinetia</i>	<i>scandens</i>	Grows well
Pandanaceae	<i>Pandanus</i>	<i>amaryllifolius</i>	To be planted yet
Pandanaceae	<i>Pandanus</i>	<i>basedowii</i>	Grows well
Pandanaceae	<i>Pandanus</i>	<i>brassilag</i>	Cold only slightly affecting lower ones
Pandanaceae	<i>Pandanus</i>	<i>conicus</i>	Grows slowly but well

Pandanaceae	<i>Pandanus</i>	<i>conoideus</i>	To be planted yet
Pandanaceae	<i>Pandanus</i>	<i>cookii</i>	Grows well
Pandanaceae	<i>Pandanus</i>	<i>dammannii</i>	Dislikes winter rainfall, rots in centre
Pandanaceae	<i>Pandanus</i>	<i>gemmifer</i> "Eacham"	Grows well
Pandanaceae	<i>Pandanus</i>	<i>gemmifer</i> "McIlwraith Range"	Grows slower than others
Pandanaceae	<i>Pandanus</i>	<i>gemmifer</i> "Typical Wet Tropics Gorge Form"	Grows well
Pandanaceae	<i>Pandanus</i>	<i>lanceolata</i>	New Caledoniana
Pandanaceae	<i>Pandanus</i>	<i>monticola</i>	Grows easily
Pandanaceae	<i>Pandanus</i>	<i>oblatus</i>	Grows steadily
Pandanaceae	<i>Pandanus</i>	<i>solmslaubachii</i>	Grows well
Pandanaceae	<i>Pandanus</i>	sp. Big Betty	Large form of <i>gemmifer</i>
Pandanaceae	<i>Pandanus</i>	sp. Hopevale	Grows well, many puppies
Pandanaceae	<i>Pandanus</i>	sp. Madagascar	Large and spiney
Pandanaceae	<i>Pandanus</i>	sp. Paluma Range	Grows well prob form of <i>P.cookii</i>
Pandanaceae	<i>Pandanus</i>	sp. PNG	Grows well after couple years
Pandanaceae	<i>Pandanus</i>	<i>spiralis</i>	Grows well
Pandanaceae	<i>Pandanus</i>	<i>stuhlmanii</i>	species identity TBC
Pandanaceae	<i>Pandanus</i>	<i>tectorius</i> (syn. <i>pedunculatus</i>)	Grows easily
Pandanaceae	<i>Pandanus</i>	<i>utilis</i>	Recently planted but growing well
Pandanaceae	<i>Pandanus</i>	<i>vandermerchii</i>	species identity TBC
Pandanaceae	<i>Pandanus</i>	<i>yalna</i>	Grows surprisingly well
Pandanaceae	<i>Pandanus</i>	<i>zea</i>	Grows surprisingly well
Passifloraceae	<i>Adenia</i>	<i>heterophylla</i>	Slow growing but succeeding
Passifloraceae	<i>Passiflora</i>	sp. Kuranda	Grows very well
Philydraceae	<i>Helmholtzia</i>	<i>glaberrima</i>	Slow, needs lots of water
Phormiaceae	<i>Dianella</i>	<i>atraxis</i>	Easy, likes wet summers
Phormiaceae	<i>Dianella</i>	<i>bambusifolia</i>	Easy, serrate margins
Phormiaceae	<i>Dianella</i>	<i>brevipedunculata</i>	Easy
Phormiaceae	<i>Dianella</i>	<i>caerulea</i> var.	Easy
Phormiaceae	<i>Dianella</i>	<i>congesta</i>	Grows well
Phormiaceae	<i>Dianella</i>	<i>fruticans</i>	Just planted
Phormiaceae	<i>Dianella</i>	sp. "Finch Hatton"	Easy
Phormiaceae	<i>Dianella</i>	sp. "Lismore"	Easy
Phormiaceae	<i>Dianella</i>	sp. "Mt Warning"	Easy, broad leaves
Phormiaceae	<i>Dianella</i>	sp. "Undara Grasslands"	Thriving- grey foliage
Phormiaceae	<i>Dianella</i>	sp. Topaz white fruit	Easy

Phytolaccaceae	<i>Monococcus</i>	<i>echinophorus</i>	Grows easily
Pittosporaceae	<i>Auranticarpa</i>	<i>edentata</i>	Grows easily, fruits
Pittosporaceae	<i>Auranticarpa</i>	<i>ilicifolia</i>	Grows well, fruits
Pittosporaceae	<i>Auranticarpa</i>	<i>rhombofolia</i>	Grows easily
Pittosporaceae	<i>Bursaria</i>	<i>incana</i>	Easy
Pittosporaceae	<i>Bursaria</i>	<i>spinosa</i> subsp. <i>spinosa</i>	Easy
Pittosporaceae	<i>Citriobatus</i>	<i>multiflorum</i>	Grows easily syn (<i>P. multiflorum</i>)
Pittosporaceae	<i>Hymenosporum</i>	<i>flavum</i>	Grows easily
Pittosporaceae	<i>Pittosporum</i>	<i>angustifolium</i> (syn <i>phillyreoides</i>)	Grows rather well
Pittosporaceae	<i>Pittosporum</i>	<i>ferrugineum</i>	Only 1 planted, possible weed potential
Pittosporaceae	<i>Pittosporum</i>	<i>moluccana</i>	Grows very well
Pittosporaceae	<i>Pittosporum</i>	<i>trilobum</i>	Just planted
Pittosporaceae	<i>Pittosporum</i>	<i>undulatum</i>	Grows easily
Pittosporaceae	<i>Pittosporum</i>	<i>venulosum</i>	Grows easily
Poaceae	<i>Bambusa</i>	<i>arnhemica</i>	Very vigorous
Poaceae	<i>Leptaspis</i>	<i>banksii</i>	Easy and attractive grass
Poaceae	<i>Loleba</i>	<i>atra</i>	Fast growing, after winter (syn <i>B. forbesii</i>)
Poaceae	<i>Pogonatherum</i>	<i>crinitum</i>	Grows well, need water
Poaceae	<i>Schizostachyum</i>	sp. Murray Island	Fast growing
Podocarpaceae	<i>Podocarpus</i>	<i>dispermus</i>	Moderate but easy
Podocarpaceae	<i>Podocarpus</i>	<i>elatus</i>	Easy
Podocarpaceae	<i>Podocarpus</i>	<i>grayae</i> (including sp. aff. <i>grayae</i>)	Fast and easy
Podocarpaceae	<i>Podocarpus</i>	<i>lawrencei</i>	Growing amazingly enough
Podocarpaceae	<i>Podocarpus</i>	<i>smithii</i>	Slow growing
Podocarpaceae	<i>Podocarpus</i>	<i>spinulosus</i>	Slow growing
Podocarpaceae	<i>Prumnopitys</i>	<i>ladei</i>	Easy to grow
Podocarpaceae	<i>Sundacarpus</i>	<i>amarus</i>	Easy to grow, relatively fast growing
Polypodiaceae	<i>Microsorium</i>	sp. River Heads- Hervey Bay	Quick grower
Polypodiaceae	<i>Platyserium</i>	<i>bifurcatum</i> (Paluma and NE NSW)	Easy
Polypodiaceae	<i>Platyserium</i>	<i>hillii</i>	Easy
Polypodiaceae	<i>Platyserium</i>	<i>superbum</i>	Easy
Polypodiaceae	<i>Platyserium</i>	<i>veitchii</i>	Easy in sun
Polypodiaceae	<i>Pyrrosia</i>	<i>confluens</i> var. <i>confluens</i>	Easy
Polypodiaceae	<i>Pyrrosia</i>	<i>longifolia</i>	Easy
Polypodiaceae	<i>Pyrrosia</i>	<i>rupestris</i>	Easy
Proteaceae	<i>Alloxylon</i>	<i>flammeum</i>	Easy to grow but prone to necrosis

Proteaceae	<i>Alloxylon</i>	<i>wickhamii</i>	Easy to grow
Proteaceae	<i>Athertonia</i>	<i>diversifolia</i>	Easy
Proteaceae	<i>Austromuelleria</i>	<i>trinervia</i>	Hard to grow
Proteaceae	<i>Banksia</i>	<i>dentata</i>	Must be in a warm suntrap
Proteaceae	<i>Banksia</i>	<i>ericifolia</i>	Easy
Proteaceae	<i>Banksia</i>	<i>integrifolia</i> subsp. <i>integrifolia</i>	Easy
Proteaceae	<i>Banksia</i>	<i>oblongifolia</i>	Easy
Proteaceae	<i>Banksia</i>	<i>plagiocarpa</i>	Easy
Proteaceae	<i>Banksia</i>	<i>robur</i>	Easy
Proteaceae	<i>Buckinghamia</i>	<i>celsissima</i>	Mt Lewis red, large leaved and typical forms
Proteaceae	<i>Buckinghamia</i>	<i>ferruginiflora</i>	Rel. easy. Flowers
Proteaceae	<i>Cardwellia</i>	<i>sublimis</i>	Mod fast growing
Proteaceae	<i>Carnarvonia</i>	<i>araliifolia</i> var. <i>araliifolia</i>	Fast growing
Proteaceae	<i>Carnarvonia</i>	<i>araliifolia</i> var. <i>montana</i>	Fast growing
Proteaceae	<i>Darlingia</i>	<i>darlingiana</i>	Easy
Proteaceae	<i>Darlingia</i>	<i>ferruginea</i>	Moderately easy in shelter
Proteaceae	<i>Floydia</i>	<i>praealta</i>	Grows slowly but steadily
Proteaceae	<i>Grevillea</i>	<i>baileyana</i>	Easy to grow
Proteaceae	<i>Grevillea</i>	<i>baileyana</i> "Iron Range"	Easy to grow- larger leaves
Proteaceae	<i>Grevillea</i>	<i>hilliana</i>	Easy to grow (SQLD & NQLD)
Proteaceae	<i>Grevillea</i>	<i>robusta</i>	Simple
Proteaceae	<i>Hakea</i>	<i>gibbosa</i>	Grows easily, short plant
Proteaceae	<i>Hakea</i>	<i>macraeana</i>	Easy, but being shaded
Proteaceae	<i>Helicia</i>	<i>australasica</i>	Moderate, need more
Proteaceae	<i>Helicia</i>	<i>blakei</i>	Moderate needs shade
Proteaceae	<i>Helicia</i>	<i>glabriflora</i>	Moderate, flowers when young
Proteaceae	<i>Helicia</i>	<i>lamingtoniana</i>	Fast and easy
Proteaceae	<i>Helicia</i>	<i>nortoniana</i>	Easy, flowers heavily
Proteaceae	<i>Hicksbeachia</i>	<i>pilosa</i> form from drier sites	Easy
Proteaceae	<i>Hicksbeachia</i>	<i>pilosa</i> form from Topaz	Easy once established
Proteaceae	<i>Hicksbeachia</i>	<i>pinnatifolia</i>	Easy once established
Proteaceae	<i>Hollandaea</i>	<i>riparia</i>	Grows well, needs some sun
Proteaceae	<i>Hollandaea</i>	<i>sayeriana</i>	Grows really well, even in sun
Proteaceae	<i>Lomatia</i>	<i>arborescens</i>	Grows well- need more sun
Proteaceae	<i>Lomatia</i>	<i>fraseri</i>	Grows partially likes cooler climate
Proteaceae	<i>Lomatia</i>	<i>fraxinifolia</i>	Grows well

Proteaceae	<i>Lomatia</i>	<i>silaiifolia</i>	Grows well
Proteaceae	<i>Macadamia</i>	<i>claudiensis</i>	Grows very well
Proteaceae	<i>Macadamia</i>	<i>grandis</i>	Grows well in light shade
Proteaceae	<i>Macadamia</i>	<i>integrifolia</i>	Grows well, no problems
Proteaceae	<i>Macadamia</i>	<i>ternifolia</i>	Grows well, small tree, fruits
Proteaceae	<i>Macadamia</i>	<i>tetraphylla</i>	Grows easily
Proteaceae	<i>Macadamia</i>	<i>whelanii</i>	Grows easily
Proteaceae	<i>Musgravea</i>	<i>heterophylla</i>	Easy to grow and flowers well
Proteaceae	<i>Musgravea</i>	<i>stenostachya</i>	Easy. Fruits
Proteaceae	<i>Neorites</i>	<i>kevedianus</i>	Easy although SIDS can occur
Proteaceae	<i>Opisthiolepis</i>	<i>heterophylla</i>	Grows easily
Proteaceae	<i>Orites</i>	<i>excelsus</i>	Grows well
Proteaceae	<i>Orites</i>	<i>megacarpus</i>	Grows well. Fruits
Proteaceae	<i>Placospermum</i>	<i>coriaceum</i>	Grows well, prone to SIDS
Proteaceae	<i>Stenocarpus</i>	<i>angustifolius</i>	Poor specimen
Proteaceae	<i>Stenocarpus</i>	<i>cryptocarpus</i>	Grows well
Proteaceae	<i>Stenocarpus</i>	cultivar. Doreen	Easy
Proteaceae	<i>Stenocarpus</i>	cultivar. Forest Gem	Easy
Proteaceae	<i>Stenocarpus</i>	<i>davallioides</i>	Grows well
Proteaceae	<i>Stenocarpus</i>	<i>reticulatus</i>	Grows fast in sun
Proteaceae	<i>Stenocarpus</i>	<i>salignus</i>	Easy. Flowers
Proteaceae	<i>Stenocarpus</i>	<i>sinuatus</i>	Slow but steady growth
Proteaceae	<i>Stenocarpus</i>	sp. Hinchinbrook-Tully (F.D.Hockings AQ229860)	Needs prominent site. Slow growing
Proteaceae	<i>Stenocarpus</i>	<i>verticis</i>	Grows well
Proteaceae	<i>Triunia</i>	<i>erythrocarpa</i>	Needs sheltered site
Proteaceae	<i>Triunia</i>	<i>robusta</i>	Easy, flowers
Rhamnaceae	<i>Alphitonia</i>	<i>excelsa</i>	Common recruits
Rhamnaceae	<i>Alphitonia</i>	<i>incana</i>	Very fast growing. Fruits
Rhamnaceae	<i>Alphitonia</i>	<i>petriei</i>	Very fast growing. Fruits
Rhamnaceae	<i>Alphitonia</i>	<i>whitei</i>	Moderately fast growing. Fruits
Rhamnaceae	<i>Emmenosperma</i>	<i>alphitonioides</i>	Grows fast
Rhamnaceae	<i>Emmenosperma</i>	<i>cunninghamii</i>	Recently planted
Rhamnaceae	<i>Rhamnus</i>	<i>nepalensis</i>	Slow to grow
Rhizophoraceae	<i>Carallia</i>	<i>brachiata</i>	Mod fast growing
Rosaceae	<i>Prunus</i>	<i>turneriana</i>	Easy to grow, need sheltered site
Rubiaceae	<i>Atractocarpus</i>	<i>benthamianus</i> subsp. <i>glaber</i>	Shade

Rubiaceae	<i>Atractocarpus</i>	<i>chartaceus</i>	Shade
Rubiaceae	<i>Atractocarpus</i>	<i>fitzalanii</i> subsp. <i>fitzalanii</i>	Easy to grow
Rubiaceae	<i>Atractocarpus</i>	<i>merikin</i>	Needs moist site
Rubiaceae	<i>Atractocarpus</i>	<i>sessilis</i>	Need more of these
Rubiaceae	<i>Canthium</i>	<i>odoratum</i>	Fragrant flowers
Rubiaceae	<i>Everistia</i>	<i>vacciniifolia</i>	Grows well
Rubiaceae	<i>Gardenia</i>	<i>actinocarpa</i>	Grows slowly but ok
Rubiaceae	<i>Gardenia</i>	<i>ovularis</i>	Grows well in shade
Rubiaceae	<i>Gardenia</i>	<i>scabrella</i> (including G sp. Weipa)	Grows well, flower always
Rubiaceae	<i>Gardenia</i>	<i>tessellaris</i>	Hard to grow, but ok
Rubiaceae	<i>Guettarda</i>	<i>speciosa</i>	Dislikes the cold
Rubiaceae	<i>Hodgkinsonia</i>	<i>frutescens</i>	Grows well, hates drying out
Rubiaceae	<i>Hodgkinsonia</i>	<i>ovatiflora</i>	Self recruiting
Rubiaceae	<i>Ixora</i>	<i>beckleri</i>	Slow growing
Rubiaceae	<i>Ixora</i>	<i>timorensis</i>	Slow growing (ex <i>klanderiana</i>)
Rubiaceae	<i>Larsenaikia</i>	<i>jardinei</i>	Grows well
Rubiaceae	<i>Larsenaikia</i>	<i>ochreatea</i>	Grows well and flowers well
Rubiaceae	<i>Morinda</i>	<i>citrifolia</i> var. <i>bracteata</i>	Hates the cold
Rubiaceae	<i>Morinda</i>	<i>citrifolia</i> var. <i>citrifolia</i>	Hates the cold
Rubiaceae	<i>Nauclea</i>	<i>orientalis</i>	Needs sun in summer
Rubiaceae	<i>Neolamarckia</i>	<i>cadamba</i>	Very fast growing
Rubiaceae	<i>Neonauclea</i>	<i>gordoniana</i>	Grows ok, in wrong spot
Rubiaceae	<i>Pavetta</i>	<i>australiensis</i> var. <i>australiensis</i>	Grows easily, flowers fragrant
Rubiaceae	<i>Psychotria</i>	<i>fitzalanii</i>	Slow grower
Rubiaceae	<i>Randia</i>	<i>audasii</i>	Easy, lovely flowers, self recruiting too
Rubiaceae	<i>Randia</i>	<i>moorei</i>	Slow growing
Rubiaceae	<i>Randia</i>	<i>tuberculosa</i>	Difficult to grow well
Rubiaceae	<i>Rubiaceae</i> Gen nov.	sp. Shute Harbour	Fragrant flowers, compact habit
Rutaceae	<i>Acradenia</i>	<i>euodiiformis</i>	Moderate growth rate, likes water
Rutaceae	<i>Acronychia</i>	<i>aberrans</i>	Recently planted
Rutaceae	<i>Acronychia</i>	<i>acidula</i>	Easy but hates leached heavy clay
Rutaceae	<i>Acronychia</i>	<i>acronychioides</i>	Easy, flowers heavily
Rutaceae	<i>Acronychia</i>	<i>baeuerlenii</i>	Easy, prefers shade
Rutaceae	<i>Acronychia</i>	<i>crassipetala</i>	Easy in shade, fruits heavily
Rutaceae	<i>Acronychia</i>	<i>imperfiorata</i>	Grows well by cuttings
Rutaceae	<i>Acronychia</i>	<i>laevis</i>	Easy

Rutaceae	<i>Acronychia</i>	<i>littoralis</i>	Grows easily
Rutaceae	<i>Acronychia</i>	<i>oblongifolia</i>	Grows easily
Rutaceae	<i>Acronychia</i>	<i>octandra</i>	Easy
Rutaceae	<i>Acronychia</i>	<i>pauciflora</i>	Easy
Rutaceae	<i>Acronychia</i>	<i>pubescens</i>	Easy in the shade
Rutaceae	<i>Acronychia</i>	<i>suberosa</i>	Grows well
Rutaceae	<i>Acronychia</i>	<i>vestita</i>	Grows well
Rutaceae	<i>Acronychia</i>	<i>wilcoxiana</i>	Grows slowly but steadily
Rutaceae	<i>Bosistoa</i>	<i>floydii</i>	Recently planted
Rutaceae	<i>Bosistoa</i>	<i>medicinalis</i>	Moderate growth (<i>B. brassii</i> included herein)
Rutaceae	<i>Bosistoa</i>	<i>pentacocca</i> var. <i>pentacocca</i>	Slow, nice flush
Rutaceae	<i>Bosistoa</i>	<i>transversa</i>	Slow (<i>selwynii</i> and <i>transversa</i>)
Rutaceae	<i>Bouchardatia</i>	<i>neurococca</i>	Slow
Rutaceae	<i>Citrus</i>	<i>australasica</i>	Yellow, Green and Red (<i>sanguinea</i>)
Rutaceae	<i>Citrus</i>	<i>australis</i>	Grows easily, fruits
Rutaceae	<i>Citrus</i>	<i>garrawayi</i>	Grows well, grafted and non-grafted
Rutaceae	<i>Citrus</i>	<i>inodora</i>	Grows slowly, flowers
Rutaceae	<i>Clausena</i>	<i>smyrelliana</i>	Grows easily
Rutaceae	<i>Dinosperma</i>	<i>erythrococtum</i>	Good growth rate
Rutaceae	<i>Dinosperma</i>	<i>melanophloia</i>	Moderate grower
Rutaceae	<i>Dinosperma</i>	<i>stipitatum</i>	Slow, flowers
Rutaceae	<i>Flindersia</i>	<i>acuminata</i>	Grows easily
Rutaceae	<i>Flindersia</i>	<i>australis</i>	Grows slowly but steadily
Rutaceae	<i>Flindersia</i>	<i>bennettiana</i>	Grows steadily
Rutaceae	<i>Flindersia</i>	<i>bourjotiana</i>	Grows fast
Rutaceae	<i>Flindersia</i>	<i>brassii</i>	Grows well
Rutaceae	<i>Flindersia</i>	<i>brayleyana</i>	Grows almost too well
Rutaceae	<i>Flindersia</i>	<i>collina</i>	Grows well
Rutaceae	<i>Flindersia</i>	<i>iffiaiana</i>	Grows well
Rutaceae	<i>Flindersia</i>	<i>oppositifolia</i>	Grows well, flowers and fruits
Rutaceae	<i>Flindersia</i>	<i>pimenteliana</i>	Grows very well
Rutaceae	<i>Flindersia</i>	<i>schottiana</i>	Grows very well
Rutaceae	<i>Flindersia</i>	<i>xanthoxyla</i>	Moderate grower
Rutaceae	<i>Geijera</i>	<i>salicifolia</i>	Slow but 4m
Rutaceae	<i>Glycosmis</i>	<i>trifoliata</i>	Weed potential
Rutaceae	<i>Halfordia</i>	<i>kendack</i>	Easy in shade, attractive species

Rutaceae	<i>Lunasia</i>	<i>amara</i>	Grows well
Rutaceae	<i>Medicosma</i>	<i>cunninghamii</i>	Grows well
Rutaceae	<i>Medicosma</i>	sp. East Mulgrave River	Recently planted, unusual leaves
Rutaceae	<i>Melicope</i>	<i>bonwickii</i>	Grows well
Rutaceae	<i>Melicope</i>	<i>broadbentiana</i>	Grows well, dislikes drying out
Rutaceae	<i>Melicope</i>	<i>elleryana</i>	Grows easily
Rutaceae	<i>Melicope</i>	<i>hayesii</i>	Grows well
Rutaceae	<i>Melicope</i>	<i>jonesii</i>	Grows easily
Rutaceae	<i>Melicope</i>	<i>micrococca</i>	Easy
Rutaceae	<i>Melicope</i>	<i>peninsularis</i>	Fast
Rutaceae	<i>Melicope</i>	<i>rubra</i>	Easy, self recruits
Rutaceae	<i>Melicope</i>	<i>vitiflora</i>	Moderate grower
Rutaceae	<i>Melicope</i>	<i>xanthoxyloides</i>	Moderate grower
Rutaceae	<i>Micromelum</i>	<i>minutum</i>	Slow grower but easy
Rutaceae	<i>Murraya</i>	<i>ovatifoliolata</i>	Slow at first
Rutaceae	<i>Pentaceras</i>	<i>australe</i>	Grows easily
Rutaceae	<i>Pitaviaster</i>	<i>haplophyllus</i>	Grows well
Rutaceae	<i>Sarcomelicope</i>	<i>simplicifolia</i> subsp. <i>simplicifolia</i>	Grows easily
Rutaceae	<i>Zanthoxylum</i>	<i>brachyacanthum</i>	Grows well
Rutaceae	<i>Zanthoxylum</i>	<i>ovalifolium</i>	Grows well
Rutaceae	<i>Zanthoxylum</i>	<i>veneficum</i>	Grows well but degenerating
Rutaceae	<i>Ziera</i>	<i>collina</i>	Recently planted
Rutaceae	<i>Ziera</i>	sp. Binjour Plateau	Recently planted
Rutaceae	<i>Ziera</i>	<i>granulata</i> var. <i>adenodonta</i>	Grows easily, large oil glands in leaves
Sapindaceae	<i>Alectryon</i>	<i>connatus</i>	Slow, need to confirm identity
Sapindaceae	<i>Alectryon</i>	<i>coriaceus</i>	Mod fast growing
Sapindaceae	<i>Alectryon</i>	<i>semicinereus</i>	Fast growing
Sapindaceae	<i>Alectryon</i>	<i>subcinereus</i>	Mod. fast growing
Sapindaceae	<i>Alectryon</i>	<i>tomentosus</i> var. <i>tomentosus</i>	Grows well in full sun
Sapindaceae	<i>Arytera</i>	<i>distylis</i>	Slow grower
Sapindaceae	<i>Arytera</i>	<i>divaricata</i>	Mod grower
Sapindaceae	<i>Arytera</i>	<i>pauciflora</i>	Slow grower
Sapindaceae	<i>Atalaya</i>	<i>multiflora</i>	Grows well
Sapindaceae	<i>Atalaya</i>	<i>rigida</i>	Establishes well
Sapindaceae	<i>Atalaya</i>	<i>salicifolia</i>	Grows well
Sapindaceae	<i>Castanospora</i>	<i>alphanthii</i>	Grows fast. Local and NEQLD (differ)

Sapindaceae	<i>Cnesmocarpon</i>	<i>discolor</i>	Slow growing, slow to establish
Sapindaceae	<i>Cupaniopsis</i>	<i>anacardioides</i>	Easy
Sapindaceae	<i>Cupaniopsis</i>	<i>cooperorum</i>	Easy
Sapindaceae	<i>Cupaniopsis</i>	<i>dallachyi</i>	Easy, narrow growth habit, red n growth
Sapindaceae	<i>Cupaniopsis</i>	<i>diploglottoides</i>	Easy in shade
Sapindaceae	<i>Cupaniopsis</i>	<i>flagelliformis</i> var. <i>australis</i>	Easy
Sapindaceae	<i>Cupaniopsis</i>	<i>flagelliformis</i> var. <i>flagelliformis</i>	Easy. Cape Form, <i>C. curvidentata</i> and typical form
Sapindaceae	<i>Cupaniopsis</i>	<i>fleckeri</i>	Mod easy grower
Sapindaceae	<i>Cupaniopsis</i>	<i>foveolata</i>	Easy grower
Sapindaceae	<i>Cupaniopsis</i>	<i>newmanii</i>	Easy grower
Sapindaceae	<i>Cupaniopsis</i>	<i>parvifolia</i>	Easy grower
Sapindaceae	<i>Cupaniopsis</i>	<i>serrata</i>	Slow grower
Sapindaceae	<i>Cupaniopsis</i>	<i>shirleyana</i>	Mod grower
Sapindaceae	<i>Cupaniopsis</i>	<i>sp. ? labelled as wadsworthii.</i>	Easy
Sapindaceae	<i>Cupaniopsis</i>	<i>wadsworthii</i>	Mod grower
Sapindaceae	<i>Dictyoneura</i>	<i>obtusa</i>	Easy in shade, but should try sun
Sapindaceae	<i>Dimocarpus</i>	<i>australianus</i>	Slow but 4m tall
Sapindaceae	<i>Diploglottis</i>	<i>australis</i>	Grows fast from tubes
Sapindaceae	<i>Diploglottis</i>	<i>bernieana</i>	Easy if given protection
Sapindaceae	<i>Diploglottis</i>	<i>bracteata</i>	Easy. "Tableland" and "Josephine" forms
Sapindaceae	<i>Diploglottis</i>	<i>campbellii</i>	Easy
Sapindaceae	<i>Diploglottis</i>	<i>diphylostegia</i>	Easy
Sapindaceae	<i>Diploglottis</i>	<i>harpullioides</i>	Easy if given shade
Sapindaceae	<i>Diploglottis</i>	<i>macrantha</i>	Easy
Sapindaceae	<i>Diploglottis</i>	<i>obovata</i>	Easy
Sapindaceae	<i>Diploglottis</i>	<i>pedleyi</i>	Easy if given water
Sapindaceae	<i>Diploglottis</i>	<i>smithii</i>	Easy
Sapindaceae	<i>Elattostachys</i>	<i>megalantha</i>	Grows well, recently planted
Sapindaceae	<i>Elattostachys</i>	<i>microcarpa</i>	Grows very well
Sapindaceae	<i>Elattostachys</i>	<i>nervosa</i>	Grows steadily
Sapindaceae	<i>Ganophyllum</i>	<i>falcatum</i>	Grows well
Sapindaceae	<i>Guioa</i>	<i>acutifolia</i>	Fast-moderate, easy to grow
Sapindaceae	<i>Guioa</i>	<i>lasioneura</i>	Easy to grow
Sapindaceae	<i>Guioa</i>	<i>montana</i>	Easy
Sapindaceae	<i>Guioa</i>	<i>sarcopterifructa</i>	Hard to grow, but ok, needs shelter
Sapindaceae	<i>Guioa</i>	<i>semiglauca</i>	Grows very well

Sapindaceae	<i>Guioa</i>	sp. aff <i>pteropoda</i>	Strange thing, flowers on trunk
Sapindaceae	<i>Harpullia</i>	<i>alata</i>	Easy in shade
Sapindaceae	<i>Harpullia</i>	<i>arborea</i>	Easy, fast growing
Sapindaceae	<i>Harpullia</i>	<i>frutescens</i>	Easy, prone to drying out but recover well
Sapindaceae	<i>Harpullia</i>	<i>hillii</i>	Slow for me
Sapindaceae	<i>Harpullia</i>	<i>pendula</i>	Easy proforms well
Sapindaceae	<i>Harpullia</i>	<i>ramiflora</i>	Easy, maybe too easy
Sapindaceae	<i>Harpullia</i>	<i>rhyticarpa</i> "Rex Range" "Gold Hill" "Noah creek"	Easy growing
Sapindaceae	<i>Jagera</i>	<i>javanica</i> subsp. <i>australiana</i>	Grows well, red new growth
Sapindaceae	<i>Jagera</i>	<i>pseudorhus</i> var. <i>integerrima</i>	In pots
Sapindaceae	<i>Jagera</i>	<i>pseudorhus</i> var. <i>pseudorhus</i> forma. <i>pilioscicula</i>	Grows well, slowly
Sapindaceae	<i>Jagera</i>	<i>pseudorhus</i> var. <i>pseudorhus</i> forma. <i>pseudorhus</i>	Self recruiting
Sapindaceae	<i>Lepiderema</i>	<i>hirsuta</i>	Grows well
Sapindaceae	<i>Lepiderema</i>	<i>ixiocarpa</i>	Likes moist soil with shade
Sapindaceae	<i>Lepiderema</i>	<i>largiflorens</i>	Hates drying out
Sapindaceae	<i>Lepiderema</i>	<i>pulchella</i>	Grows easily
Sapindaceae	<i>Lepiderema</i>	<i>punctulata</i>	Grows well
Sapindaceae	<i>Lepiderema</i>	<i>sericolignis</i>	Grows easily
Sapindaceae	<i>Mischarytera</i>	<i>lautereriana</i>	Fast growing
Sapindaceae	<i>Mischarytera</i>	sp. Oliver Creek-Thornton Peak (L.J.Webb+ 10903)	Moderate grower, needs protection
Sapindaceae	<i>Mischocarpus</i>	<i>exangulatus</i>	Moderate grower
Sapindaceae	<i>Mischocarpus</i>	<i>grandissimus</i>	Spectacular plant
Sapindaceae	<i>Mischocarpus</i>	<i>lachnocarpus</i> (QLD)	Purple aril, grows well
Sapindaceae	<i>Mischocarpus</i>	<i>macrocarpus</i>	Grows well, but slowly
Sapindaceae	<i>Mischocarpus</i>	<i>pyriformis</i> . subsp. <i>pyriformis</i>	Grows easily
Sapindaceae	<i>Mischocarpus</i>	sp. aff. <i>lachnocarpus</i> (NENSW)	Orange aril, grows well
Sapindaceae	<i>Mischocarpus</i>	<i>stipitatus</i>	Attractive new growth
Sapindaceae	<i>Rhysotoechia</i>	<i>bifoliolata</i> subsp. <i>bifoliolata</i>	Grows slowly
Sapindaceae	<i>Rhysotoechia</i>	<i>robertsonii</i>	Grows easily
Sapindaceae	<i>Sapindaceae</i>	sp. Palmerston	Easy, grows fast
Sapindaceae	<i>Sarcopteryx</i>	<i>martyana</i>	Grows well
Sapindaceae	<i>Sarcopteryx</i>	<i>montana</i>	In pots
Sapindaceae	<i>Sarcopteryx</i>	<i>reticulata</i>	Grows well
Sapindaceae	<i>Sarcopteryx</i>	<i>stipata</i>	Grows slowly
Sapindaceae	<i>Sarcotoechia</i>	<i>cuneata</i>	Grows ok
Sapindaceae	<i>Sarcotoechia</i>	<i>heterophylla</i>	Grows well

Sapindaceae	<i>Sarcotoechia</i>	<i>protracta</i>	Grows easily
Sapindaceae	<i>Sarcotoechia</i>	<i>serrata</i>	Grows easily
Sapindaceae	<i>Sarcotoechia</i>	<i>villosa</i>	Needs a protected position
Sapindaceae	<i>Synima</i>	<i>cordierorum</i>	Grows well
Sapindaceae	<i>Synima</i>	<i>macrophylla</i>	Grows well
Sapindaceae	<i>Toechima</i>	<i>daemelianum</i>	Grows easily
Sapindaceae	<i>Toechima</i>	<i>erythrocarpum</i>	Grows easily
Sapindaceae	<i>Toechima</i>	<i>monticola</i>	Grows slowly
Sapindaceae	<i>Toechima</i>	<i>pterocarpum</i>	Grows well. Fruits
Sapindaceae	<i>Toechima</i>	<i>tenax</i>	Grows easily. Fruits
Sapindaceae	<i>Tristiropsis</i>	<i>acutangula</i> (syn. <i>canarioides</i>)	Hates the cold
Sapotaceae	<i>Manilkara</i>	<i>kauki</i>	Slow growing
Sapotaceae	<i>Mimusops</i>	<i>elengi</i>	Slow growing
Sapotaceae	<i>Niemeyera</i>	<i>antilogia</i>	Slow growing
Sapotaceae	<i>Niemeyera</i>	<i>prunifera</i>	Grows well
Sapotaceae	<i>Niemeyera</i>	<i>whitei</i>	Slow growing
Sapotaceae	<i>Palaquium</i>	<i>galactoxylon</i>	Slow but successful
Sapotaceae	<i>Pouteria</i>	<i>australis</i>	Grows steadily
Sapotaceae	<i>Pouteria</i>	<i>castanosperma</i>	Slow to establish
Sapotaceae	<i>Pouteria</i>	<i>chartacea</i>	Grows easily
Sapotaceae	<i>Pouteria</i>	<i>eerwah</i>	Grows slowly
Sapotaceae	<i>Pouteria</i>	<i>euphlebia</i>	Grows moderate
Sapotaceae	<i>Pouteria</i>	<i>myrsinodendron</i>	Grows well
Sapotaceae	<i>Pouteria</i>	<i>obovata</i>	Surprisingly hardy
Sapotaceae	<i>Pouteria</i>	<i>pohlmaniana</i> var. <i>pohlmaniana</i>	Slow growing
Sapotaceae	<i>Pouteria</i>	<i>queenslandica</i>	Slow growing
Sapotaceae	<i>Pouteria</i>	<i>sericea</i>	Slow
Sapotaceae	<i>Pouteria</i>	sp. Barong (M.Tucker 22)	Hard to establish
Simaroubaceae	<i>Ailanthus</i>	<i>triphysa</i>	Fast
Simaroubaceae	<i>Quassia</i>	<i>bidwillii</i>	Easy
Simaroubaceae	<i>Quassia</i>	sp. Mt Nardi (B.L.Walker AQ330746)	Easy
Smilacaceae	<i>Ripogonum</i>	<i>album</i>	Grows well
Smilacaceae	<i>Ripogonum</i>	<i>brevifolium</i>	Grows slowly, just planted
Smilacaceae	<i>Ripogonum</i>	<i>discolor</i>	Grows well
Smilacaceae	<i>Ripogonum</i>	<i>fawcettianum</i>	Grows not at all
Smilacaceae	<i>Ripogonum</i>	<i>papuanum</i>	Grows easily

Smilacaceae	<i>Smilax</i>	<i>australis</i>	Grows easily
Smilacaceae	<i>Smilax</i>	<i>blumei</i>	Fast, deep red flush
Stangeriaceae	<i>Bowenia</i>	<i>serrulata</i>	Slow
Stangeriaceae	<i>Bowenia</i>	<i>spectabilis</i>	Slow, better than serrulata
Sterculiaceae	<i>Abroma</i>	<i>fastuosa</i>	Fast but prickly
Sterculiaceae	<i>Argyrodendron</i>	<i>actinophyllum</i> subsp. <i>actinophyllum</i>	Slow growing
Sterculiaceae	<i>Argyrodendron</i>	<i>actinophyllum</i> subsp. <i>diversifolium</i>	Fast growing
Sterculiaceae	<i>Argyrodendron</i>	<i>peralatum</i>	Fast growing
Sterculiaceae	<i>Argyrodendron</i>	<i>polyandrum</i>	Fast growing
Sterculiaceae	<i>Argyrodendron</i>	sp. Boonjee (RFK/2139)	Slow but successful
Sterculiaceae	<i>Argyrodendron</i>	sp. Kin Kin (AQ81198)	Slow but successful
Sterculiaceae	<i>Argyrodendron</i>	sp. Mt Lewis/Mt Haig (14307)	Slower growing
Sterculiaceae	<i>Argyrodendron</i>	sp. Penta/Big Tableland/Karnak (PIF10711)	Fast growing
Sterculiaceae	<i>Argyrodendron</i>	sp. Whyanbeel (RFK/1106)	Fast growing, spectacular tree
Sterculiaceae	<i>Argyrodendron</i>	<i>trifoliolatum</i>	Mod growing
Sterculiaceae	<i>Brachychiton</i>	<i>acerifolius</i>	Mod fast growing (local and NQLD)
Sterculiaceae	<i>Brachychiton</i>	<i>albidus</i>	Slow
Sterculiaceae	<i>Brachychiton</i>	<i>australis</i>	Slow
Sterculiaceae	<i>Brachychiton</i>	<i>bidwillii</i>	Mod fast
Sterculiaceae	<i>Brachychiton</i>	<i>bidwillii</i> x <i>discolor</i>	Slow
Sterculiaceae	<i>Brachychiton</i>	<i>collinus</i>	Growing well
Sterculiaceae	<i>Brachychiton</i>	<i>compactus</i>	Recently planted
Sterculiaceae	<i>Brachychiton</i>	<i>discolor</i>	Mod fast
Sterculiaceae	<i>Brachychiton</i>	<i>diversifolius</i> subsp. <i>orientalis</i>	Slow
Sterculiaceae	<i>Brachychiton</i>	<i>garrawayae</i>	Slow, flowers
Sterculiaceae	<i>Brachychiton</i>	<i>populneus</i> subsp. <i>populneus</i>	Mod fast
Sterculiaceae	<i>Brachychiton</i>	<i>populneus</i> x <i>acerifolius</i>	Slow. Flowered
Sterculiaceae	<i>Brachychiton</i>	<i>rupestris</i>	Mod fast
Sterculiaceae	<i>Brachychiton</i>	sp. Ormeau	Very fast growing
Sterculiaceae	<i>Brachychiton</i>	<i>velutinosus</i>	Mod fast. Flowers
Sterculiaceae	<i>Commersonia</i>	<i>bartramia</i>	Quick growing, self recruits
Sterculiaceae	<i>Commersonia</i>	<i>fraseri</i>	Quick growing. Smaller than C. b
Sterculiaceae	<i>Commersonia</i>	sp. Mt Tinbeerwah (G.P.Guymer 1786)	Quick grower.
Sterculiaceae	<i>Firmiana</i>	<i>papuana</i>	Grows fast for 3 years and stops. Flowers
Sterculiaceae	<i>Franciscodendron</i>	<i>laurifolium</i>	Grows slowly
Sterculiaceae	<i>Helicteres</i>	<i>isora</i>	Easy, stops in winter

Sterculiaceae	<i>Heritiera</i>	<i>littoralis</i>	Slow, but succeeds well, surprisingly
Sterculiaceae	<i>Sterculia</i>	<i>foetida</i>	Grows fast, digitate leaves
Sterculiaceae	<i>Sterculia</i>	<i>holtzei</i>	Fast in pots, slow in ground
Sterculiaceae	<i>Sterculia</i>	<i>quadrifida</i>	Easy
Sterculiaceae	<i>Sterculia</i>	<i>shillinglawii</i> subsp. <i>shillinglawii</i>	Fast
Sterculiaceae	<i>Sterculia</i>	sp. Annan River (L.J.Brass 20319)	Need to confirm identity
Symplocaceae	<i>Symplocos</i>	<i>Eungella</i>	Grows well
Symplocaceae	<i>Symplocos</i>	<i>hylandii</i>	Needs a protected position
Thymelaeaceae	<i>Phaleria</i>	<i>clerodendron</i>	Grows easily. Great species
Thymelaeaceae	<i>Phaleria</i>	<i>octandra</i>	Grows well
Tiliaceae	<i>Grewia</i>	<i>latifolia</i>	Small plant
Tiliaceae	<i>Grewia</i>	<i>orientalis</i>	Lanky plant
Tiliaceae	<i>Trichospermum</i>	<i>pleiostigma</i>	Moderate grower, stalls after a year
Ulmaceae	<i>Aphananthe</i>	<i>philippinensis</i>	Grows well
Ulmaceae	<i>Celtis</i>	<i>paniculata</i>	Fast grower
Ulmaceae	<i>Celtis</i>	<i>philippinensis</i>	Slow growing, attractive leaves
Ulmaceae	<i>Trema</i>	<i>orientalis</i>	Extremely fast growing
Ulmaceae	<i>Trema</i>	<i>tomentosa</i> var. <i>tomentosa</i>	Very fast growing
Ulmaceae	<i>Trema</i>	<i>tomentosa</i> var. <i>viridis</i>	Fast growing
Urticaceae	<i>Dendrocnide</i>	<i>moroides</i>	Easily out-competed
Urticaceae	<i>Dendrocnide</i>	<i>photinophylla</i>	Easy
Urticaceae	<i>Pipturus</i>	<i>argenteus</i> "Gilles" and "sp. Leo Creek"	Grows well
Violaceae	<i>Rinorea</i>	<i>bengalensis</i>	Grows slowly
Vitaceae	<i>Cayratia</i>	<i>clematidea</i>	
Vitaceae	<i>Cissus</i>	<i>antarctica</i>	Self recruits
Vitaceae	<i>Cissus</i>	<i>opaca</i>	Grows slowly
Xanthorrhoeaceae	<i>Lomandra</i>	<i>banksii</i>	Grows well, better in more sun
Xanthorrhoeaceae	<i>Lomandra</i>	<i>hystrix</i>	Grows easily
Xanthorrhoeaceae	<i>Lomandra</i>	<i>longifolia</i>	Grows easily
Xanthorrhoeaceae	<i>Lomandra</i>	<i>spicata</i>	Grows well
Xanthorrhoeaceae	<i>Romnaldia</i>	<i>grallata</i>	Harder to grow than sp. Cooper Creek
Xanthorrhoeaceae	<i>Romnaldia</i>	sp. Cooper Creek (P.I.Forster+ PIF4402)	Grows easily, much different to <i>grallata</i>
Xanthorrhoeaceae	<i>Romnaldia</i>	<i>strobilacea</i>	Recently planted
Xanthorrhoeaceae	<i>Xanthorrhoea</i>	<i>johnsonii</i>	Grows steadily but slowly
Zamiaceae	<i>Lepidozamia</i>	<i>hopei</i>	Recently planted but growing well
Zamiaceae	<i>Lepidozamia</i>	<i>peroffskyana</i>	Grows slowly

Zamiaceae	<i>Macrozamia</i>	<i>lucida</i>	Slow but easy
Zamiaceae	<i>Macrozamia</i>	<i>miquelii</i>	Slow but easy
Zamiaceae	<i>Macrozamia</i>	<i>moorei</i>	Slow but easy
Zamiaceae	<i>Macrozamia</i>	<i>mount-perriensis</i>	Slow but easy
Zamiaceae	<i>Zamia</i>	<i>floridana / integrifolia</i>	Moderately easy
Zamiaceae	<i>Zamia</i>	<i>furfuracea</i>	Easy
Zingiberaceae	<i>Alpinia</i>	<i>arctiflora</i>	Needs moist site
Zingiberaceae	<i>Alpinia</i>	<i>arundelliana</i>	Requires moist and shady
Zingiberaceae	<i>Alpinia</i>	<i>caerulea</i>	Atherton and local form
Zingiberaceae	<i>Alpinia</i>	<i>modesta</i>	Requires shady moist conditions
Zingiberaceae	<i>Curcuma</i>	<i>australasica</i>	Requires warm site
Zingiberaceae	<i>Pleuranthodium</i>	<i>racemigerum</i>	Requires shady moist conditions

SPECIES GROWN BUT HAVE DIED AS OF AUGUST 2005

FAMILY	GENUS	SPECIES	COMMENTS
Acanthaceae	<i>Acanthus</i>	<i>ilicifolius</i>	Persisted for 5 years and then got too dry
Anacardiaceae	<i>Buchanania</i>	<i>arborescens</i>	Crowded, too cold and wet
Anacardiaceae	<i>Buchanania</i>	<i>obovata</i>	Poor root-bound specimen
Annonaceae	<i>Haplostichanthus</i>	<i>ramiflora</i>	Too dry, small specimen
Annonaceae	<i>Haplostichanthus</i>	sp. Rocky River	Poor planting site
Annonaceae	<i>Polyalthia</i>	<i>australis</i>	Crappy specimen
Araceae	<i>Calamus</i>	<i>warburgii</i>	Too cold
Araceae	<i>Remusatia</i>	<i>vivipara</i>	Too cold?
Araliaceae	<i>Polyscias</i>	<i>sambucifolia</i>	Shaded out
Arecaceae	<i>Cocos</i>	<i>nucifera</i> "Malay Dwarf"	Too dry and cold
Arecaceae	<i>Hydriastele</i>	<i>wendlandiana</i>	Too cold and dry
Arecaceae	<i>Linospadix</i>	<i>palmeriana</i>	Washed away in flood
Arecaceae	<i>Nypa</i>	<i>fruticans</i>	Too cold
Asteraceae	<i>Bracteantha</i>	<i>bracteata</i>	Lack of replacement, an annual
Austrobaileyaceae	<i>Austrobaileya</i>	<i>scandens</i>	Dried out
Boraginaceae	<i>Cordia</i>	<i>subcordata</i>	Too cold
Burseraceae	<i>Canarium</i>	<i>acutifolium</i>	Cold
Burseraceae	<i>Canarium</i>	<i>australasicum</i>	Poor specimen
Caesalpiniaceae	<i>Piliostigma</i>	<i>malabaricum</i>	Too cold?

Casuarinaceae	<i>Allocasuarina</i>	<i>thalassoscopica</i>	unknown- drainage?
Chrysobalanaceae	<i>Parinari</i>	<i>nonda</i>	Poor specimens
Clusiaceae	<i>Calophyllum</i>	<i>bicolor</i>	Cold?
Clusiaceae	<i>Calophyllum</i>	<i>inophyllum</i>	Cold?
Combretaceae	<i>Terminalia</i>	<i>catappa</i>	Cold
Combretaceae	<i>Terminalia</i>	<i>ferdinandi</i>	Cold?
Cunoniaceae	<i>Gillbeea</i>	<i>adenopetala</i>	Too dry
Dichapetalaceae	<i>Dichapetalum</i>	<i>papuanum</i>	Poor specimen
Dilleniaceae	<i>Dillenia</i>	<i>alata</i>	Wrong site
Dilleniaceae	<i>Hibbertia</i>	<i>dentata</i>	Outcompeted
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>elliffii</i>	Dried out
Elaeocarpaceae	<i>Elaeocarpus</i>	<i>ferruginiflorus</i>	Dried out
Elaeocarpaceae	<i>Sloanea</i>	<i>australis</i> subsp. <i>parviflora</i>	Too small when planted
Ericaceae	<i>Rhododendron</i>	<i>lochiae</i>	Out competed
Euphorbiaceae	<i>Croton</i>	<i>stockeri</i>	To dry/competition
Euphorbiaceae	<i>Homalanthus</i>	<i>stillingiifolius</i>	Too dry
Euphorbiaceae	<i>Rockinghamia</i>	<i>brevipes</i>	Too exposed
Fagaceae	<i>Nothofagus</i>	<i>cunninghamii</i>	Grew to 1.5m in the pot and died instantly on planting
Fagaceae	<i>Nothofagus</i>	<i>moorei</i>	Died rather quickly
Flacourtiaceae	<i>Xylosma</i>	sp. Mt Lewis (G.Sankowsky+ 1108)	Unknown reason
Hernandiaceae	<i>Hernandia</i>	<i>albiflora</i>	Too cold
Himantandraceae	<i>Galbulimima</i>	<i>baccata</i>	Poor site
Hypoxidaceae	<i>Molineria</i>	<i>capitulata</i>	Too dry and cold, sth side of house
Lamiaceae	<i>Plectranthus</i>	<i>intraterraneus</i>	Too humid
Lamiaceae	<i>Plectranthus</i>	sp. "Buchanan's Fort"	Dried out, not misty enough
Lamiaceae	<i>Prostanthera</i>	<i>incisa</i>	108 all died
Lamiaceae	<i>Vitex</i>	<i>rotundifolia</i>	Too wet and cold
Lauraceae	<i>Beilschmiedia</i>	<i>recurva</i>	Too dry and competition
Lauraceae	<i>Cinnamomum</i>	<i>laubatii</i>	Lost in the grass
Lauraceae	<i>Litsea</i>	<i>bindoniana</i>	Grew well and then died
Lecythidaceae	<i>Barringtonia</i>	<i>asiatica</i>	Two have died in the pot, COLD
Lecythidaceae	<i>Planchonia</i>	<i>careya</i>	Dislikes shade in subtropics
Leeaceae	<i>Leea</i>	<i>rubra</i>	Too dry/cold
Loganiaceae	<i>Geniostoma</i>	<i>rupestre</i> var. <i>australianum</i>	Dried out, grow well beforehand
Malvaceae	<i>Lagunaria</i>	<i>petersonii</i> subsp. <i>bracteata</i>	Wrong spot-wrong plant
Meliaceae	<i>Chisocheton</i>	<i>longistipitatus</i>	Too cold

Meliaceae	<i>Dysoxylum</i>	<i>pumilum</i>	Poor specimen
Mimosaceae	<i>Acacia</i>	<i>aneura</i> var. <i>aneura</i>	Too wet, also too shady a spot
Mimosaceae	<i>Acacia</i>	<i>holosericea</i> var. <i>holosericea</i>	Easy to grow, but short lived
Mimosaceae	<i>Acacia</i>	<i>merinthrophora</i>	Unknown results
Moraceae	<i>Antiaris</i>	<i>toxicaria</i> var. <i>macrophylla</i>	Cold killed it, also small specimen
Moraceae	<i>Ficus</i>	<i>adenosperma</i>	Died at 5m tall, dry?
Musaceae	<i>Musa</i>	<i>banksii</i>	Grows well then peters out
Myrtaceae	<i>Callistemon</i>	sp. Wondecla Bluff	Crowded by megaphyll species
Myrtaceae	<i>Gossia</i>	<i>sankowskiorum</i>	Got neglected then sprayed and brushcut
Myrtaceae	<i>Kunzea</i>	<i>granitcola</i>	Roundup?
Myrtaceae	<i>Lenwebbia</i>	<i>lasioclada</i>	Dried out (NQ)
Myrtaceae	<i>Leptospermum</i>	<i>polygalifolium</i>	Too shady- old plants
Myrtaceae	<i>Pilidistigma</i>	<i>tetramerum</i>	Dried out, withered away
Myrtaceae	<i>Syzygium</i>	<i>erythrodoxum</i>	Dried out when small
Myrtaceae	<i>Syzygium</i>	<i>puberulum</i>	Just died-too shady and dry?
Myrtaceae	<i>Syzygium</i>	<i>sharoniae</i>	Difficult plant to grow
Myrtaceae	<i>Uromyrtus</i>	<i>australis</i>	Dried out
Myrtaceae	<i>Welchiodendron</i>	<i>longivalve</i>	Poor specimen, though proven within subtropics
Ochnaceae	<i>Brackenridgea</i>	<i>australiana</i>	Poor specimen
Pandanaceae	<i>Pandanus</i>	<i>lauterbachii</i>	Too dry and shady
Philydraceae	<i>Helmholtzia</i>	<i>acorifolia</i>	Too dry
Poaceae	<i>Mullerochloa</i>	<i>moreheadiana</i>	Cold/dry
Proteaceae	<i>Alloxylon</i>	<i>pinnatum</i>	Hard to grow at the best of times
Proteaceae	<i>Austromuelleria</i>	<i>trinervia</i> var. 'Daintree'	Dried out, withered away
Proteaceae	<i>Catalepidia</i>	<i>heyana</i>	Dislikes many environmental variables
Proteaceae	<i>Gevuina</i>	<i>bleasdalei</i>	Dislikes heat and drying out
Proteaceae	<i>Grevillea</i>	ctv Golden Lyre	Amazing plant, old age
Rubiaceae	<i>Atractocarpus</i>	<i>hirtus</i>	Dried out
Rubiaceae	<i>Gardenia</i>	<i>megasperma</i>	Unknown results
Rubiaceae	<i>Gardenia</i>	<i>psidioides</i>	Ground cover, wrong spot, needs sun
Rubiaceae	<i>Gardenia</i>	<i>vilhelmii</i>	Too cold and wet
Rubiaceae	<i>Pavetta</i>	<i>granitica</i>	Was sprayed by someone
Rubiaceae	<i>Psychotria</i>	sp. Little Cooper Creek	Dried out and shaded out
Rubiaceae	<i>Timonius</i>	<i>singularis</i>	Dried out
Rutaceae	<i>Acronychia</i>	<i>chooreechillum</i>	Too exposed
Rutaceae	<i>Flindersia</i>	<i>laevicarpa</i>	Died at 8m tall

Rutaceae	<i>Zieria</i>	sp. Brolga Park (A.R.Bean 1002)	Died after 6 years and at 2m tall
Sapotaceae	<i>Chrysophyllum</i>	<i>roxburghii</i>	Too cold? Poor specimen had to root prune
Sapotaceae	<i>Pouteria</i>	<i>pearsoniorum</i>	Wallabies ate it after 6 years of growth
Simaroubaceae	<i>Ailanthus</i>	<i>integrifolia</i> subsp. <i>integrifolia</i>	Too cold, poor specimens
Simaroubaceae	<i>Guilfoylia</i>	<i>monostylis</i>	Wrong spot, try again
Sterculiaceae	<i>Brachychiton</i>	<i>paradoxus</i>	Fungus in cold wet weather
Ulmaceae	<i>Celtis</i>	<i>hildebrandii</i>	Grow very fast and then stopped. Cold?
Urticaceae	<i>Boehmeria</i>	<i>nivea</i>	Competition
Urticaceae	<i>Dendrocnide</i>	<i>excelsa</i>	Soil type too wet ?
Winteraceae	<i>Bubbia</i>	<i>semecarpoides</i>	Dry?
Winteraceae	<i>Tasmannia</i>	<i>insipida</i>	Dry?
Winteraceae	<i>Tasmannia</i>	<i>membranea</i>	Dry?
Winteraceae	<i>Tasmannia</i>	<i>stipitata</i>	Died 8/05 . Too dry
Zingiberaceae	<i>Etilingera</i>	<i>australasica</i>	Too cold and dry
Zingiberaceae	<i>Hornstedtia</i>	<i>scottiana</i>	Too cold
Zingiberaceae	<i>Tapeinochilos</i>	<i>ananassae</i>	Too cold
